while improving water repellency at the same time. The Perfetto RoS is that ideal weight: no built-in insulation so you can layer over a light base layer for moderate conditions. Or you can add a thermal jersey underneath and take it to very cold conditions. You decide.

The Perfetto RoS is the one jacket that does everything well. We initially designed it as a cool-weather training and extreme-weather race piece for our pro riders, but in reality it excels in many conditions thanks to its full wind

Winter 2019 represents the biggest performance upgrade in the four generations of this jacket. RoS in the name signifies Rain or Shine. The emphasis should be on dry-weather comfort, which is where this jacket really excels, but then you get near waterproof protection if you do get caught in the rain. We worked with Gore to develop two new Castelli exclusive GORE-TEX INFINIUM™ fabrics. We use a light fleece-lined waterproof version on the forwardfacing surfaces and a lighter, stretchier fabric on the back that maintains the breathability of the previous fabric

The Perfetto family features are all there: excellent fit, easy-sliding YKK® zipper, long tail to protect from wheel spray, reflective panel on the back, and discreet styling that belies the jacket's racing pedigree.

This is the one jacket that belongs in every cyclist's quiver.

protection, great fit through stretchy fabrics, and best-in-class breathability.

NOT YOUR NORMAL REMOVABLE-SLEEVE JACKET

We went back to the design table to come up with a better way to make a removable-sleeve jacket and in the process created a brilliantly versatile jacket. The zippers sit just above the elbow and cover 3/4 of the circumference of the arm. With the sleeves in place, you have Castelli's top-performing Perfetto RoS long-sleeve jacket. Remove the sleeves and you have a real Gabba to wear with your Nano Flex arm warmers. The zippers are covered so you don't see them from the outside or feel them from the inside.

For Winter 2019 the Perfetto Convertible gets the RoS treatment: Rain or Shine. The same breathability and fit you've come to expect from the Perfetto, but now with significantly improved rain protection, including seam sealing on the shoulders. We've also differentiated the fabrics so you get extra warmth on forwardfacing surfaces and lighter stretch on rear-facing surfaces. We always thought a jacket that becomes a vest is kinda useless.

But a jacket that becomes a Gabba ... that's brilliant.

HOW COME NO ONE EVER MADE A BETTER GABBA?

In 2010 Castelli introduced the Gabba to the pros and changed the way pros race in the rain. And cold. And ride in training. Every other performance cyclist soon saw the need for a Gabba in his or her wardrobe.

We've made some minor updates along the way, but for the fourth-generation Gabba we started with a clean slate to make a significant upgrade. That involved moving it to near waterproof levels, which meant developing a new exclusive GORE-TEX INFINIUM™ fabric. We made the front-facing fabric warmer with a light brushing, while the rear-facing fabrics are lighter yet more water repellent than the previous Gabba.

We made it better in the rain through seam sealing on the shoulders and a covered zipper. Based on Team Sky testing we figured it's better to have two pockets that are easier to access with gloved hands, though we provide an internal sleeve to keep your pump or other items from moving around. It's not easy to make a better Gabba. We'll keep trying.

EASIER POCKET ACCESS

Team Sky riders asked for just 2 bigger pockets to make it easier to access with gloved hands. We added an inner sleeve to securely hold your pump, Pit Stop, or energy bar stash without diminishing pocket

VISIBILITY

THERMOSUIT FOR COOL OR COLD, DRY OR WET

The Sanremo Thermosuit solves an age-old problem of dressing for winter conditions by eliminating the drafts between your jacket and tights. This newest version adds versatility to address more weather conditions.

The lower portion is based on our best all-around tight, the Nano Flex Pro 2. The Nano Flex Xtra Dry fabric is warm and breathable in dry conditions but provides our best nanotechnology protection from splashes and light rain. The large reflective panel on the lower legs gives significant visibility and protects from wheel

The upper portion is based on the new Perfetto RoS Convertible Jacket. You get full wind protection, excellent breathability and water protection, but without insulation, so you can add warmth through your base layer(s). For high-intensity rides you can remove the GORE-TEX INFINIUM™ lower sleeves and use a Nano Flex arm warmer.

If you haven't made the jump to a winter suit, what else is it going to take?

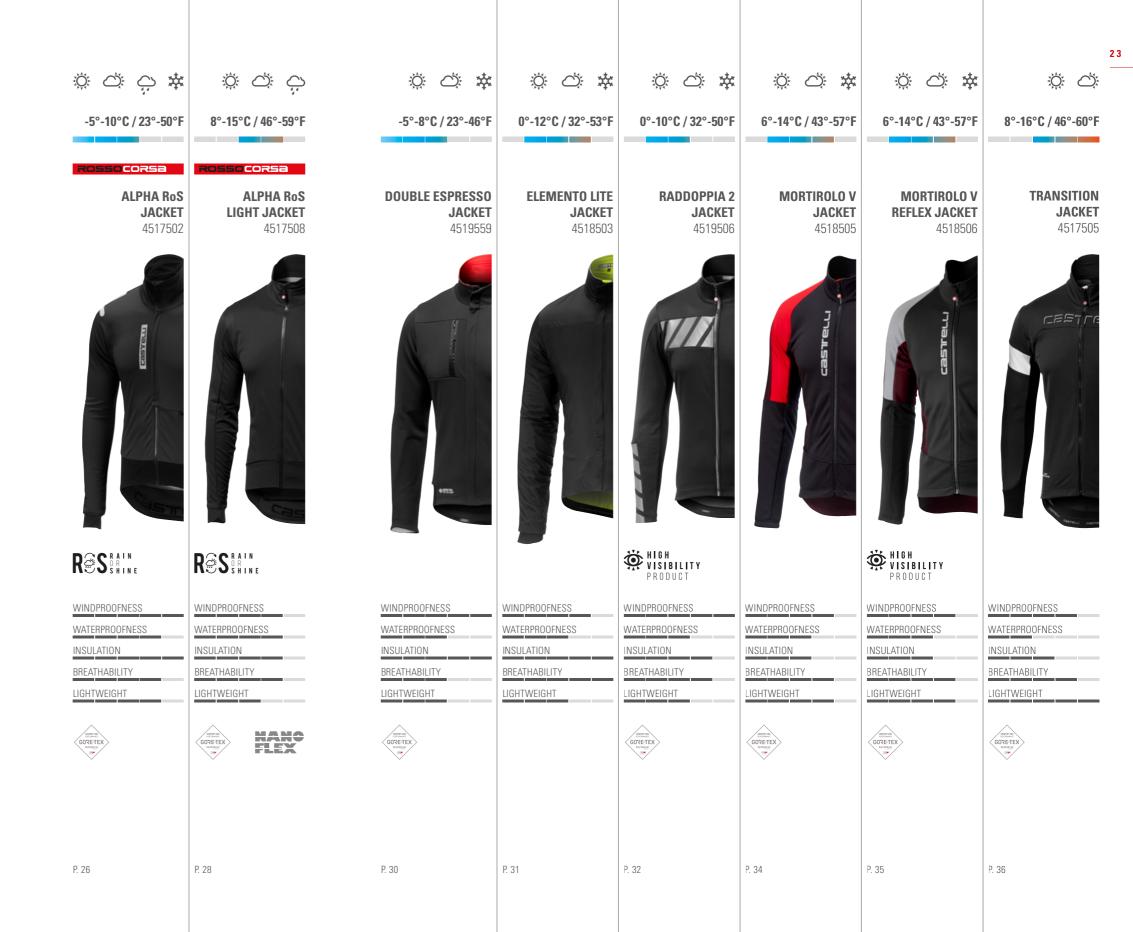

085 LIGHT BLACK

TEMPERATURE AND WEATHER

WANT TO STAY OFF THE TURBO TRAINER AND OUT ON THE ROAD DURING THE WINTER?

Then you need to choose an appropriate winter jacket for the type of weather you're likely to encounter. A good jacket will keep you warm in winter conditions — rain, wind and cold, down to the freezing point or below — and will also be able to handle the heat and sweat that you produce on club rides or high-intensity training in March. Here's a guide to help you pick the right jacket to keep you warm, dry and comfortable.

RAIN OR SHINE. BRING IT ON

When we came out with the original Alpha Jacket, we wrote, "Throw out everything you think you know about cycling jackets."

We've done it once again. So throw out everything you think you know about cycling jackets.

Until now, your cycling wardrobe has consisted of clothing for dry weather and separate clothing for wet weather. You never wore your wet-weather clothing in dry conditions because it was too clammy inside and too flappy outside. And your dry-weather clothing just didn't hold up to rain. The Gabba and Perfetto family helped bridge that gap, but the Alpha RoS takes it to another level.

We started by keeping everything that made the original Alpha Jacket your favorite dry-weather jacket: the two-layer construction to separate the insulation layer from the outer shell, the double front opening to diffuse the cold air when you open up to ventilate, the excellent breathability, the flat wrist and waist openings, the articulated collar, the insanely soft stretch fabrics, and the great fit.

By using a GORE-TEX INFINIUM[™] rain-resistant membrane and DWR treatment, selective seam sealing, careful seam placement and construction, and a waterproof YKK[®] Vislon[®] zipper, we've made the jacket essentially waterproof while not compromising the characteristics that made it such a great dry-weather jacket.

The outdoor industry has traditionally determined what counts as "waterproof": minimum 10,000 mm water column and complete seam taping. But that definition means too many compromises in the overall usability of the jacket, in the softness, in the fit, and in the jacket's overall ability to keep you dry and comfortable by maximizing breathability. So we set our own definition of real-world usability and went out and tested this on the nastiest days of our Italian fall. An occasional drop may come in through a seam, but you're going to stay warm and dry because the jacket keeps nearly all water out from the outside while letting most moisture out from the inside.

This jacket feels like a game changer. It's a significant step toward Castelli's goal of making clothing that performs impeccably in the dry but offers complete water protection in the rain. And it will make your riding enjoyable, rain or shine.

041 DARK INFINITY BLUE

MOUNTAINEERING TECHNOLOGY FOR THE BIKE

We looked to the world of ski mountaineering racing, where the competitors obsess over weight even more than we cyclists do, yet their insulation is a matter of survival, not merely comfort. And with ski mountaineering being an insanely aerobic sport, breathability is paramount.

The construction of this jacket is similar to that of an insulated alpine shell, with an insulation layer sandwiched between woven inner and outer layers. Unlike most mountain jackets, though, the woven shell isn't completely windproof; instead, we've left a small amount of permeability. The small amount of air that gets into the jacket picks up the moisture and evaporates it more efficiently than any membrane fabric available. The middle layer is a puffy insulation layer that we make in polypropylene partly because it's insanely light (specific gravity 0.6 g) but also because it won't pick up moisture from either sweat or rain.

These limited-stretch fabrics require a new cut, so this piece fits slightly looser than your race jacket. If your winter goals are new Strava PRs rather than winning races in the spring and summer, you're better served by the Alpha Light Jacket or a Perfetto. But if your goals involve a real rather than virtual finish line, this jacket will make your winter riding better.

010 Black

ORANGE

ENJOY WINTER

We've all been there: suffering through our cold-weather training because we should, not because we wanted to. We built this jacket to be warm and comfortable in those cold winter conditions. And to make you look really good doing it, so you can show that you're not the guy suffering.

We've used our light weather proof GORE-TEX INFINIUM™ 150 fabric layered over a separate brushed micro fleece insulation layer. The cut is slightly larger so that it moves with you and you can add an extra layer for super-cold conditions. We've built in articulated shoulders for greater ease of movement and given it a shaped collar to close comfortably around the neck. You have three ample rear pockets plus a secure zippered pocket on the chest for keys or money.

Think of this as our speed jacket: it'll help you through your January and February sessions so that you'll beat them all in July.

JUST LIKE ITS NAMESAKE CLIMB

The Mortirolo climb in Valtellina is a climb made famous by the Giro d'Italia. It's steep and unforgiving. It demands a lot of the rider, but reaching the top is incredibly rewarding. It's a good fivehour drive from our Castelli HQ, but the climb is so phenomenal that we made the trip twice last summer. If you're demanding of your equipment, you'll love the Mortirolo. It's incredibly versatile thanks to the front and sleeve wind protection, yet it doesn't cause overheating thanks to the fleece back. It has a large reflective panel on the back and our easy-sliding YKK® zipper to make on-the-fly ventilation adjustments a simple one-handed operation.

010 Black

CLIMATE CHANGE

Winters are getting warmer, and this jacket means you'll be ready. It's our lightest-weight winter jacket, and we've replaced the fleece lining found on most of our winter jackets with a lightly brushed jersey that helps wick moisture away. This jacket provides very little insulation, but with the full GORE-TEX INFINIUM™ front and sleeve front you'll be able to layer it to cover most conditions. Not only is it lighter weight for less-cold conditions, it also has a high degree of stretch and freedom of movement, so it feels great on those transition days between fall and winter.

Packs up small to easily store in jersey pocket

BLACK

Light, packable, highly breathable, durably waterproof and aero fitting. This is the first piece that brings all those features together into a jacket made for the rider who has to (or choses to) ride in any weather conditions. When GORE-TEX® introduced SHAKEDRY™ technology two seasons ago, we immediately saw the opportunity to make waterproof jackets lighter than ever. And then we tested it and realized that we're also able to make them more breathable than ever. Now, thanks to Gore's new Topo inserts we're able to bring a close fit and extreme packability to a jacket that's fully protective for all-day riding in the rain. We've given it two external pockets so you don't have to unzip to reach your jersey pockets. We've given it a longer tail to shield you from the spray coming off your back wheel. We've given it a soft neck liner. And we've given it reflectivity for safety. Compared to our Idro 2 jacket, this is more of a workhorse jacket. It's made for the rider who leaves his house for an all-day ride in the rain, for the rider whose jacket is a necessity and not a piece that stays in a pocket until it's needed.

THE SMALLEST, LIGHTEST GORE-TEX® JACKET

This jacket can change the way you ride. It's so small you'll find yourself stuffing it in your pocket for rides with even a remote chance of rain, just because it takes up so little space. And you'll be extending your rides into conditions when rain is in the forecast because you know you'll be perfectly covered. Using Gore's newest SHAKEDRY™ two-layer fabric, we constructed the most minimalistic jacket that still covers your needs. It fits over your jersey and vest. It covers your tail. It has a tall collar. It has a YKK® Vislon® waterproof zipper. It has reflectivity. But that's about it. Compared to the Idro Pro jacket, this one is made to go in your pocket for every ride, yet still provide the essential protection when called into duty.

YKK® Vislon® zipper

Front and rear reflectivity

We put a lot of thought and engineering into our highperformance Superleggera Shell Jacket. The main body fabric is Japanese-made Pertex® Quantum, but we've made it without the standard coating so that you get a very small amount of air permeability that lets sweat escape, while the DWR coating will keep light rain at bay. On the back we've used a totally waterproof stretch panel that sheds wheel spray, and the stretch allows for a great close-to-body fit. Best of all, the piece takes up minimal space in a jersey pocket.

READY FOR THE UNEXPECTED?

A lightweight packable shell, ideal for stuffing into your pocket in case of rain on those unpredictable days. The Squadra ER jacket will shut out the wind and provide a bit of protection from light rain while still being small enough to pack into your back pocket or seat bag. An essential item for every ride.

WEATHER CONDITIONS

3-layer insulated construction with engineered air permeability gives our best combination of warmth, breathability and light weight

Japanese-made air-permeable woven-textured nylon outer shell with water-repellent finish

Polypropylene synthetic down insulation layer provides warmth while allowing full breathability without any water absorption

Plissé stretch panels on sides allow for close-to-body fit yet with full freedom of movement

2 rear pockets with reflective gusset at bottom

041 Dark infinity blue

010 BLACK

PACKABLE SUPER-INSULATED VENTILATION

This vest is so many things: insanely light, packable, super warm yet prevents overheating. The air-permeable fabrics allow a small amount of air in to evaporate sweat, while the polypropylene synthetic down insulation keeps your core warm. It fits and feels like a warm mountaineering vest yet weighs next to nothing and even packs away into a jersey pocket when not needed.

QUINTESSENTIALLY PRO

Of the pieces that are available to Team Sky riders but not to the rest of us, this is probably the garment they use the most. It's a thermal vest with no wind protection and not as warm as any of our other vests. The simple use of our Warmer fabric provides a good bit of extra warmth for your core, but without a windproof membrane to trap moisture. It's ideal for high-intensity riding in cool weather, or staying comfortably warm on a mildtemperature recovery day. Find out why the pros always have one in their suitcases.

3 rear pockets plus covered key pocket

Reflective arm bands and back panel

010 Black/red

Our RoS Rain or Shine products are made to be your favorite garments for dry weather, yet provide significant water protection. We made this jersey with a double-layer fabric that keeps more wind out than your traditional jersey, yet has no membrane so still has some airflow to maximize breathability. Hence the Nelmezzo name - Italian for "in the middle." The tighter weave and new Nano Flex Xtra Dry make this all but waterproof: you can wear it by itself on wet roads or in light rain/mist, although in steady rain you will likely still reach for a rain shell.

Polartec® NeoShell® 4 way stretch fabric on front is windproof, water proof and highly breathable

Nano Flex Xtra Dry back provides ventilation with effective water repellency

Sleeves feature 3/4 wind protection

YKK® Vislon® zipper for easy opening and closing

Front and rear reflective panels for visibility

Front zippered pocket

3 rear pockets

The idea behind the Trasparente Jersey is to extend those fall days before you transition from a long-sleeve jersey to a jacket. We've given it the weight and freedom of movement of a thermal jersey but added 4 way stretch water and wind proof Polartec® NeoShell® fabric on the front. It keeps the wind off and lets you stay warm in conditions when you'd normally be layering on a vest or even reaching for a light jacket. The back is in our Nano Flex Xtra Dry for significant warmth and water repellency. To increase versatility we've built in significant reflective panels on the front and back and added a zippered key and money pocket on the front. We've kept the lines clean because this will be a cool-weather favorite for years to come.

JUST RIGHT

Long-sleeve jerseys are tough to do right. It comes down to the fabric: it needs to keep some of the wind out but not too much; it needs to be stretchy, but Lycra® makes it hold moisture. The long-sleeve jersey is a key piece for Team Sky riders, and we've obsessed with them to get it right. We've developed a new fabric that's the right blend of thickness, fleece, airflow and stretch. Then we made the jersey in a close-to-body fit with our droptail design. But we didn't make it overly complicated because it shouldn't be.

PROLOGUE OR PRO LOGO

The Prologo name is Italian for "prologue," the opening salvo in a Grand Tour. But many of our customers pronounce it like "Pro Logo." And we don't mind at all.

The Prologo Jersey, now in its sixth generation, does feature a big logo, but more than that it brings a lot of tech directly from our experience with pro racing. The fabric is remarkably soft yet stretchy and features bioceramic nanoparticles added to the fused polymer, which reflect far infrared light to both protect you from hot sun and help the body keep itself warm.

The construction also borrows a lot of cues from pro racing: the same drop-tail construction that helps the jersey sit right around the waist while allowing generous pockets that sit lower on the back, the wraparound side panels that ventilate the back without letting in too much air from the front, and the easy-sliding YKK® Vislon® zipper.

BLACK/IVORY/DARK GRAY

SKY RIDERS' FAVORITE JERSEY?

Team Sky riders asked for a mid-weight jersey for training and racing in cool weather. We worked hard to find that balance between warmth, moisture management and comfort, and we just happened to make this great aero-fitting jersey that's insanely comfortable and instantly became a rider favorite. Wear it with just a base layer on a slightly cool day, or add arm warmers and a vest and you have a super-comfortable outfit for cooler weather. Or even layer it under a Gabba in cold weather. It's a surprisingly versatile addition to your wardrobe.

LIGHT BLACK

TEMPERATURE AND WEATHER

NOTHING SPOILS A WINTER RIDE LIKE GETTING COLD.

If you want to keep cycling through the cold winter months, it pays to dress properly; keeping your legs insulated is essential if you want to ride in comfort. Fortunately, Castelli has a wide selection of the best gear to keep your legs protected from the cold, rain and wind.

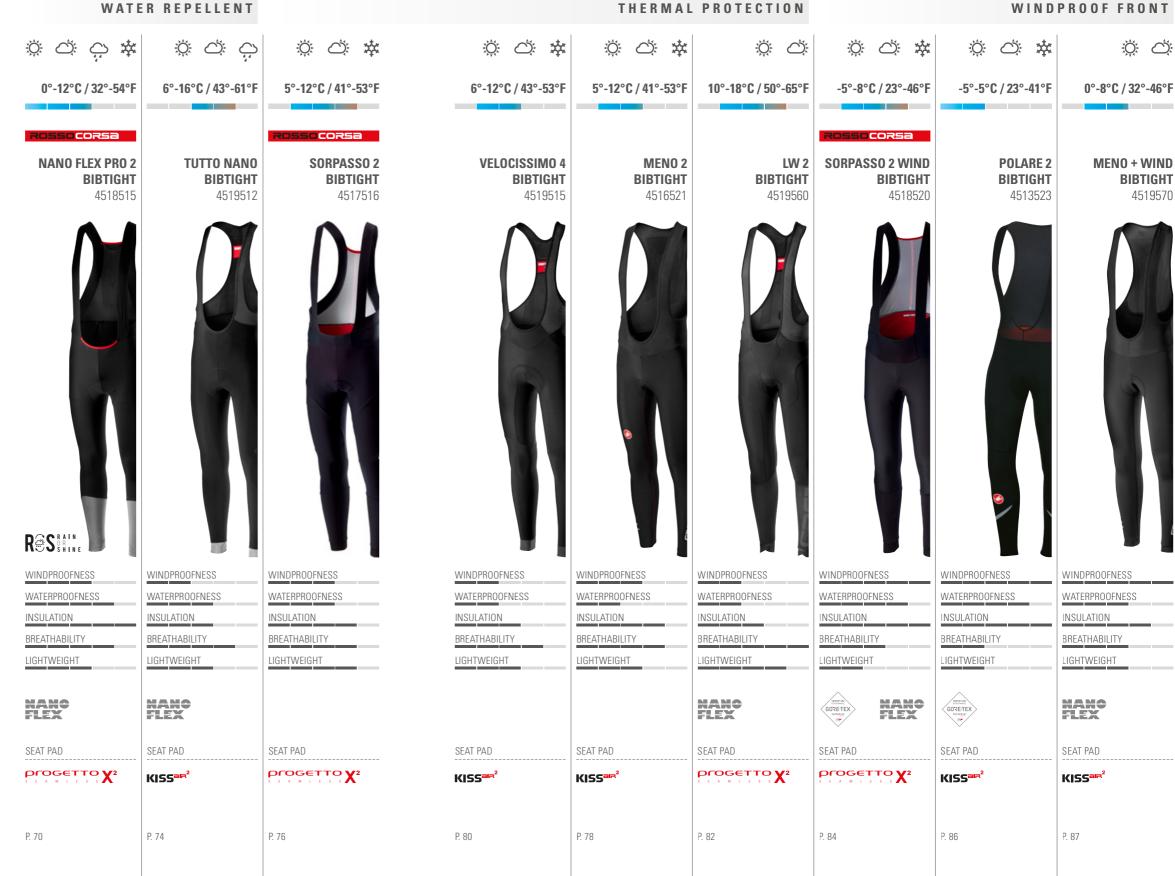

prog∈tto **V**² S E A M L E S S 🔨

Pro-level seat pad for maximum comfort. New seamless skin-care layer is softer against the skin and reduces abrasion. Separate saddle-shaped cushioning layer with progressive damping through high-density foam and gel inserts.

KISS^{air²}

High-performance seat pad for all conditions. Single-piece construction with infinitely variable thickness. Updated for 2019 with more supportive padding and a softer, stretchier fabric next to the skin.

Fewer seams to reduce chance of water coming in Lie-flat bib construction

Progetto X² Air Seamless pad for long hours in the saddle

RAIN OR SHINE BIBTIGHT

Introducing Nano Flex Xtra Dry fabric. Eight years have passed since Castelli pioneered nanotechnology coatings in cycling clothing to provide a higher level of water protection without sacrificing breathability or stretch. We never stopped working on improving the fabric, and after numerous small improvements we're ready with the first major update. The base fabric is a tighter-knit double-layer construction, and the water repellency treatment is improved to offer even more protection. We're not quite there yet on our goal of bringing full waterproofness to a nonmembrane fabric, but this is a significant improvement in making your foul-weather riding much more comfortable. This will also be your go-to tight for dry conditions. It's a no-compromise piece for all your cool-weather riding.

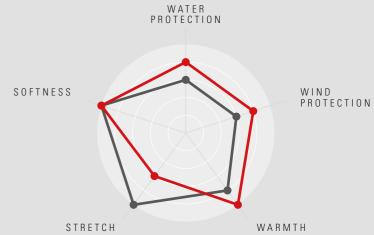

It's not just about the fabric, though. This is a serious training tight, so it gets our Progetto X^2 Air Seamless seat pad. For total protection in the high-splash area of the inner leg, we use a fully reflective waterproof fabric that adds a high degree of nighttime safety to this tight. The tight is constructed with the bare minimum of seaming, which helps keep the rain out and also makes it more comfortable. This is the best all-around tight that we know how to make with today's technology, but we're still working to make it obsolete as soon as possible.

NANO FLEX XTRA DRY

The double face base fabric gives maximum warmth, maximum water repellency, and low air permeability to keep the wind out. Not as stretchy as Nano Flex 3G for a compressive fit. Castelli's Nano Flex treatment comprises a topical nanotechnology microfilament mechanical water repellent finish combined with a short chain chemical DWR finish for class leading water repellency.

WE CALL IT THE COLD AND WET SHORT

This is the piece designed for racing in the cold and/or wet. The new Nano Flex Xtra Dry fabric keeps out more water than ever and is warmer than ever thanks to the new double-face tightly knit construction. We've minimized seams for comfort and to keep water out, and used a raw edge at the bottom of the leg, cut just above the knee to add a bit of extra warmth.

While this short is our best short for wet conditions, it's also a great choice for dry and cold if you want to pair it with a knee or leg warmer.

Lower leg is non-brushed to prevent overheating yet features a water-repellent finish to protect from road spray

Progetto X² Air Seamless seat pad

top race short as used by Team Sky

We've been making our tights better and better for colder weather, and at the same time we've seen a drop-off in demand for 3/4 knickers. So we fill that gap with the LW Bibtight. LW stands for Light Winter, the conditions that are becoming more and more common. So we build the upper portion to Team Sky's specs with the Thermoflex fabric that keeps your thighs and intimate parts warm, and then we add a thinner non-brushed water-repelling Lycra® to the lower legs. To keep the lightweight feel we avoid zippers at the ankles, but we put in our Progetto X² Air Seamless seat pad because we know this will be your go-to piece for long fall and spring rides.

Thermoflex fabric for maximum warmth and stretch

Anatomic cut taken from the Free Aero Race Bibshort, Castelli's top race short as used by Team Sky

Knee length with a raw edge that doesn't cut into the back

Progetto X² Air Seamless seat pad

HOW THE PROS DO IT

The Omloop has been a pro piece since we first saw riders at a cold and dry Omloop Het Nieuwsblad a few years back cutting off their knee warmers. So we figured out how to make a thermal short that doesn't need a gripper elastic to hold it in place, yet that comes down right to the bend of the knee for extra warmth. We developed this piece with Team Sky, and it's become a rider favorite for both training and racing. Try it and you'll understand

WEIGHT: 88 g (Large)

3D Mesh lightweight 100% polyester wicks moisture and dries quickly

Semi open mesh allows maximum air flow without becoming too transparent

Full length zip makes for easy on and off

2 rear pockets for stashing whatever you need

Can be used as hot weather outdoor jersey

085 LIGHT BLACK

INDOOR TRAINING NEVER LOOKED THIS GOOD

We made this jersey for the rigors of indoor training. The 3D Mesh fabric allows maximum airflow for cooling while the 100% polyester content means it provides maximum moisture wicking. We made it on the limit of not being too transparent in case you want to wear it for group training sessions, or if you're using it at home and want to take it off after warming up the long zipper means it comes off easy. We put a couple of pockets on the back so you can stash your AirPods or phone or headband or whatever you haul to your training station. We've kept the collar low and the waist short for maximum cooling. It just happens to be a great hot weather jersey that you'll pull back out come August.

INSIDER BIBSHORT 4519575

Reflective heat-transfer viz strips for visibility

010 BLACK

THEY MAKE A SHORT FOR THAT?

We made the short that we wanted for our own indoor training. It had to be cool, comfortable, good wicking and with just enough padding. We've used our Inferno fabric that is a 80% polyester construction to help wick sweat away and avoid getting wetted out. We put our light weight Giro Air elastic at the leg endings and our lighter KISS Air² seat pad since we don't want/need as much padding.

OUR SPECTACULAR GLOVE

The creation of this product started with a list of the things we wanted to fix about winter gloves: we wanted to make a glove that's warm without being bulky, make it easy to get on and off, make it mostly waterproof without having it suck in dry weather due to low breathability, and make it super comfortable. We innovated everything on this glove, starting with the base fabrics: we've used a stretch water-resistant windproof outer shell over PrimaLoft® Gold insulation to make it warm, and an insanely soft inner liner that happens to slide easily over even a sweaty hand for easy on/off. The wrist zipper allows the glove to open almost completely for ingress/egress and also slims up the glove so it doesn't look like a ski glove, even though it's good for moderately cold temperatures.

FITS LIKE A GLOVE

To fit into our Perfetto family, a glove had better be pretty spectacular. By using reduced-seaming technology and the new GORE-TEX INFINIUM™ fabric, we've made a glove that is deceptively warm while staying reasonably thin and allowing maximum dexterity. We've added grip features in the palm and our Castelli Damping System for comfort.

This is the kind of breakthrough glove you've come to expect from Castelli.

THE RIGHT MIX

This is our best all-round cold-weather glove. It's completely waterproof and insulated, yet we've kept the bulk down to a minimum so you don't feel like you're wearing ski gloves. The stretch wrist opening makes it easy to get on and off, and the reflective details are useful in the low light conditions of winter riding.

OUR WARMEST COLD-WEATHER GLOVE

The Estremo Glove was designed for the coldest conditions-ideal for low temperatures and bad weather. Constructed from a windproof GORE-TEX INFINIUM™ fabric combined with a fleecy material on the palm, covered with silicone texture for a better grip and durability. Proof that we take harsh winter riding seriously.

COOL WEATHER OR CHANGING CONDITIONS

The idea behind this glove is full GORE-TEX INFINIUM $^{\text{TM}}$ wind and water protection in the thinnest possible package. It's great for those cool days when you need to keep the wind off but don't need insulation, or those days with changing conditions such as a cold start or long alpine descents. Minimal seaming keeps the glove comfortable on the hand, while silicone grip zones make sure you're in control at all times.

LIGHT BUT SURPRISINGLY WARM

Our Lightness Glove has been a perennial favorite, but now we've updated it with better fit, easier on/off, better grip and better padding. We've kept the same brushed fleece back of hand that gives just the right amount of warmth without overheating. And we've added the Castelli Damping System padding and an innovative wrist cuff to make ingress and egress easier than ever.

READY TO COMBAT THE ELEMENTS

The Rain or Shine concept within the Castelli collection is a designation for products that are designed to excel in dry weather yet provide significant water protection when you get caught in the rain. This Rain or Shine shoecover is made with a stretch water resistant and windproof breathable fabric with a fleece liner, cut high to the base of the calf muscle for warmth in dry weather. For rainy conditions, we've moved critical seams toward the outside, where they're less exposed. The zipper is also moved to the side, and we've included a molded reflective heel cup for visibility.

THE SHOE COVER THAT DOES EVERYTHING WELL

We call it the Pioggia shoe cover, and although the name is Italian for "rain," that doesn't really capture the essence of this bootie. Sure, it's completely waterproof, with sealed seams, a waterproof zipper and a silicone-sealed top edge to keep water from entering. We've backed the PU-coated fabric with fleece to make this bootie warm in the coldest conditions, while the high stretch also gives it a close, comfortable and aero fit.

010 BLACK

ONE GOAL: KEEP YOUR FEET WARM

We set out to create our warmest bootie ever, which meant rethinking how booties are made. For the windproofing we went with GORE-TEX INFINIUM™ fleece-backed fabric, which also lets more moisture escape than any other windproof fabric. Then we added a second fleece layer with Polartec® Power Stretch® Pro™, which is unrivaled in overall loft. The two layers are thick enough that we had to do a "wheel well" single-layer construction by the ball of the foot to prevent the fabric from rubbing on the crank. We made the bootie high for extra warmth and gave reasonable splash protection. We recommend our Venti Soft Sock for maximum warmth.

A WARMER DILUVIO BOOTIE

TEAM **sky**

OFFICIAL PARTNER

The "Pro" in the Diluvio Pro name indicates that this product comes from a request from Team Sky riders for an even warmer bootie for training in cold and wet conditions. We made the neoprene 33% thicker and raised the height to cover the lower leg up to just under the calf muscle. The top edge is raw cut to help seal against the skin to keep water out, the seams are sealed like on a wet suit, and the fabric remains very stretchy for great fit and ease in pulling on. Reflectivity on the heel keeps you visible in low-light conditions.

ADDED FLEXIBILITY

Thanks to the open construction under the foot, this bootie can be used with road or MTB shoes so you can cover all your cold-weather rides. The seams are glued and we even finished the top edge to help prevent water from coming into the bootie. Reflective details on the back help make this the do-it-all bootie.

SEAL OUT THE WEATHER AND GET AERO

We've taken a different approach to the traditional shoecover. Making the waterproof fabric significantly more stretchy allows you to actually pull this bootie on over your shoe, but the lack of a zipper in the back makes it more comfortable and improves waterproofing. The smooth surface will help you stay aero in your next foul-weather road race.

WEATHER CONDITIONS

Solare fabric keeps the chill off without causing overheating UPF 50+ protection

Polyester based for excellent moisture management Double-side silicone elastic at top for excellent grip

SURPRISINGLY USEFUL

We can officially only rate these warmers at UPF 50+, but in our laboratory tests they actually blocked 99.8 percent of damaging UV rays. We used a polyester base that is not only more effective than nylon at blocking UV rays but is also much better at keeping you dry, which means these arm sleeves are better in both cooler and warmer conditions. We've kept the construction very clean to eliminate seams that can rub, and we used our double-sided silicone elastic to make sure they stay in place. They fold up extremely small, so they're great to stick in your pockets for your next big mountain day.

Rain or Shine product made to excel in both dry and wet

Patented convertible front panel can close for wet conditions and open for extra ventilation in warmer conditions

Pertex® Quantum base fabric with low air permeability to let sweat escape, while the DWR coating keeps light rain at bay Extra thin and lightweight to fit under your helmet

009 ANTHRACITE

OVER-ENGINEERED SIMPLICITY

We wanted to make a cycling cap that's great in dry weather yet can protect in case of rain. The trick is a patented system in which the windproof, water-repellent front panel can fold back for complete breathability or fold forward to protect. Better yet, you have three ways to wear it: with the protective panel folded back, moderate breathability with the cap turned around backward, or full close. The Pertex® fabric is ridiculously thin to fit under the helmet, yet has enough air permeability to prevent you from wetting out as you would under a non-breathable cap.

The Perfetto RoS is the one jacket that does everything well. We initially designed it as a cool-weather training and extreme-weather race piece for our pro riders, but in reality it excels in many conditions thanks to its full wind protection, great fit through stretchy fabrics, and best-in-class breathability. Winter 2019 represents the biggest performance upgrade in the four generations of this jacket. RoS in the name signifies Rain or Shine. The emphasis should be on dry-weather comfort, which is where this jacket really excels, but then you get near waterproof protection if you do get caught in the rain. We worked with Gore to develop two new Castelli exclusive GORE-TEX INFINIUM™ fabrics. We use a light fleece-lined waterproof version on the forward-facing surfaces and a lighter, stretchier fabric on the back that maintains the breathability of the previous fabric while improving water repellency at the same time.

The Perfetto RoS is that ideal weight: no built-in insulation so you can layer over a light base layer for moderate conditions. Or you can add a thermal jersey underneath and take it to very cold conditions. You decide.

The Perfetto family features are all there: excellent fit, easy-sliding YKK® zipper, long tail to protect from wheel spray, reflective panel on the back, and discreet styling that belies the jacket's racing

This is the one jacket that belongs in every cyclist's quiver.

HOW COME NO ONE EVER MADE A BETTER GABBA?

In 2010 Castelli introduced the Gabba to the pros and changed the way pros race in the rain. And cold. And ride in training. Every other performance cyclist soon saw the need for a Gabba in his or her wardrobe.

We've made some minor updates along the way, but for the fourth-generation Gabba we started with a clean slate to make a significant upgrade. That involved moving it to near waterproof levels, which meant developing a new exclusive GORE-TEX INFINIUM™ fabric. We made the front-facing fabric warmer with a light brushing, while the rear-facing fabrics are lighter yet more water repellent than the previous Gabba.

We made it better in the rain through seam sealing on the shoulders and a covered zipper. Based on Team Sky testing we figured it's better to have two pockets that are easier to access with gloved hands, though we provide an internal sleeve to keep your pump or other items from moving around.

It's not easy to make a better Gabba. We'll keep trying.

085 LIGHT BLACK

LIGHTER. MORE PACKABLE. MORE BREATHABLE

The Perfetto Light started life as a request from our pro riders: "I want to wear the Gabba all the time, but sometimes it's too hot." So a somewhat lighter and more breathable Gabba became the Perfetto Light.

New for Winter 19, the Perfetto Light is improved in nearly every way: it's now lighter, with thinner fabrics on the front and back, which make it easier to stuff in a pocket. It has both better rain protection and improved breathability. It has two larger pockets that better complement the three pockets on the jersey you wear underneath this jacket.

The new Perfetto Light is closer to a Perfetto Vest with sleeves, which makes it perfect for your spring and fall training and racing in cool conditions.

DARK STEEL BLUE

LIGHT BLACK

MARINE BLUE

PERFETTO VEST IS NOW EVEN MORE PERFECT

IThe Perfetto Vest has been a favorite with everyone from our pro riders to Castelli staff to performance cyclists everywhere. But we wanted to make it even more perfect, so we developed a new exclusive GORE-TEX INFINIUM™ fabric that is both lighter and more water repellent than the old fabric while maintaining the stretch and breathability. We matched it up with better water repellency in the back while maintaining the breathability, and further improved details like the back pockets and reflectivity. A more perfect Perfetto Vest.

870 SILVER GRAY/BLACK

We call it a light jacket but the comfort range is surprising. It dips well into temperatures where you might normally reach for a full protection jacket, yet the surprising breathability makes it still comfortable in temps when you may have worn arm warmers and a vest in the past. And it keeps you dry.

RoS stands for Rain or Shine. It's a label we give our most advanced products that excel in both dry and wet conditions. For dry conditions, you're looking for comfort along with breathability to prevent you from getting wet and chilled from the inside. But with wet-weather clothing, you're looking for protection that will help you stay warm by keeping the rain out and letting sweat escape. The Alpha RoS W Light Jacket ticks both of those boxes.

Both the front and back materials represent a significant step forward in rain protection. These fabrics are used with reduced seaming, and seam sealing where necessary. We call this "functional waterproofing" because while we don't guarantee that no drop will ever enter the jacket, we promise you that this is our best effort to keep you warm and dry in the widest range of conditions.

WEIGHT: 347g (Small)

Japanese-made air-permeable woven-textured nylon outer shell with water-repellent finish

Polypropylene synthetic down insulation layer provides warmth while allowing full breathability without any water absorption

Plissé stretch panels on sides, elbows and wrists allow for close-to-body fit yet with full freedom of movement

3 rear pockets with reflective gusset at bottom

Inner waist closure allows you to block out drafts (closed) or allow extra breathability (open)

412 DARK INFINITY BLUE/BRILLIANT PINK

Inspired by our favorite puffy jackets, we've made the cycling equivalent with a lot of warmth and minimal weight. But while your traditional down jacket is "down proof" to keep the feathers from escaping and hence offers very low breathability, our synthetic down allows us to make the textile layers air permeable for excellent breathability. The construction is much more similar to that of an insulated alpine shell, with an insulation layer sandwiched between woven inner and outer layers. Unlike with most mountain jackets, the woven shell isn't completely windproof, but instead we've left a small amount of permeability. The small amount of air that gets into the jacket picks up the moisture and evaporates it more efficiently than any membrane fabric available. The middle layer is a puffy insulation layer that we make in polypropylene partly because it's insanely light (specific gravity 0.6g) but also because it won't pick up moisture from either sweat or rain.

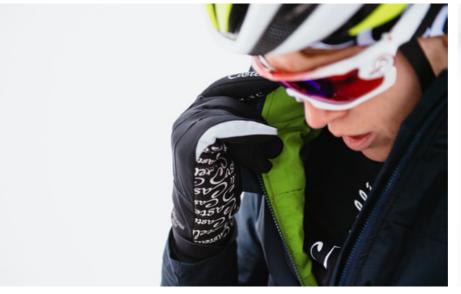

These limited-stretch fabrics require a new cut, so this one fits slightly looser than your race jacket. If your winter goals are new Strava PRs rather than winning races in the spring and summer, you're better served by the Alpha Light Jacket or a Perfetto. But if your goals involve a real rather than virtual finish line, this jacket will make your winter riding better.

UNBELIEVABLY LIGHT

A jacket that weighs less than a jersey? Real GORE-TEX®, no less? And it packs up to fit in half a jersey pocket? And it's the most breathable GORE-TEX® ever? Hard to believe, but it's all true. This jacket is a game changer. It's fully waterproof, as you expect from GORE-TEX®, but with its exceptional breathability and packability you'll find that it replaces all your other shell jackets. If your ride has the slightest chance of rain or a long descent or the possibility of temperatures dropping, this jacket will automatically go in your pocket. You can confidently do longer rides in conditions that you would have avoided with all your old jackets. While you can get this fabric from other brands, you can't get the Castelli fit, design and construction.

WEATHER CONDITIONS

with 10,000 mm water column

Slight amount of stretch for excellent fit in riding position Folds into half a jersey pocket for emergency situations Innovative "gutters" drain water away from hands and off back Waterproof zipper and seam sealing keep all water out

Just like the name says, we wanted to create the ideal simple emergency rain jacket. We made it completely waterproof and compact, and, as you'd expect from Castelli, we also gave it an amazing on-bike fit, yet it's still roomy enough to fit over a Gabba. This jacket is an emergency piece, so we knew you wouldn't want to break the bank with it, but the only real compromise compared to our top-of-the-line offerings is in breathability. We didn't make this for an all-day rain ride, but it's just right for your next emergency.

THE SPRING AND FALL DO-EVERYTHING JERSEY

Our RoS Rain or Shine products are made to be your favorite garments for dry weather, yet provide significant water protection. We made this jersey with a double-layer fabric that keeps more wind out than your traditional jersey, yet has no membrane so still has some airflow to maximize breathability. Hence the Nelmezzo name - Italian for "in the middle." The tighter weave and new Nano Flex Xtra Dry make this all but waterproof: you can wear it by itself on wet roads or in light rain/mist, although in actual rain you will likely still reach for a rain shell.

FITS LIKE A JERSEY, PROTECTS LIKE A JACKET

The fabric combinations are closer to those of our Transition Jacket, but the fit and lightness are more reminiscent of a jersey. It's one of those pieces that is hard to classify. The front facing fabric on torso and sleeves is Polartec®'s spectacular NeoShell® fabric that is wind and waterproof while being very breathable and stretchy. The back in Nano Flex Xtra Dry provides water repellency while letting heat escape. You'll certainly use it in conditions where you used to resort to a jacket, but you'll look and feel light and nimble like on a jersey day. The slim cut makes it look like you're just cheating the weather report.

NOTHING SPOILS A WINTER RIDE LIKE GETTING COLD.

If you want to keep cycling through the cold winter months, it pays to dress properly; keeping your legs insulated is essential if you want to ride in comfort. Fortunately, Castelli has a wide selection of the best gear to keep your legs protected from the cold, rain and wind.

TEMPERATURE

AND WEATHER

PROGETTO X2

Pro-level seat pad for maximum comfort. New seamless skin-care layer is softer against the skin and reduces abrasion. Separate saddle-shaped cushioning layer with progressive damping through high-density foam and gel inserts.

KISS^{ala2}

High-performance seat pad for all conditions. Single-piece construction with infinitely variable thickness. Updated for 2019 with more supportive padding and a softer, stretchier fabric next to the skin.

Nano Flex Xtra Dry fabric brings new, higher level of water

Double-face knit keeps you warmer because less wind comes in Reflective waterproof splash guards on inside of lower legs

Double layer over backside protects from water coming off rear

Fewer seams to reduce chance of water coming in Lie-flat bib construction

Progetto X² Air Seamless Donna seat pad for long hours in the

Better in cold and dry and better in wet conditions, the new Nano Flex Xtra Dry fabric makes this your most technical tight. The base fabric is a tighter-knit double-layer construction, and the water repellency treatment is improved to provide even more protection. We're not quite there yet on our goal of bringing full waterproofness to a non-membrane fabric, but this is a significant improvement in making your foul-weather riding much more comfortable. It will also be your go-to tight for dry conditions, though. It's a no compromise piece for all your coolweather riding.

But it's not just about the fabric. This is a serious training tight, so it gets our Progetto X² Air Seamless Donna seat pad. For total protection in the high-splash area of the inner leg, we use a fully reflective waterproof fabric that adds a high degree of nighttime safety to this tight. The tight is constructed with the bare minimum of seaming, which helps keep the rain out and also makes it more comfortable. This is the best all-around tight that we know how to make with today's technology.

WE CALL IT THE COLD AND WET SHORT

This is the piece designed for racing in the cold and/or wet. The new Nano Flex Xtra Dry fabric keeps out more water than ever and is warmer than ever thanks to the new double-face tightly knit construction. We've kept seams to a minimum for comfort and to keep water out, and used a raw edge at the bottom of the leg, cut just above the knee to add a bit of extra warmth.

While this short is our best short for wet conditions, it's also a great choice for dry and cold if you want to pair it with a knee or leg warmer.

THE MAGIC MIX

The magic of this tight comes from the remarkable fit and the wide temperature range. The winning ingredient is our Thermoflex Core2 fabric, which has a nylon outer layer and a hollow-core polyester inner layer. This layer traps air for extra warmth while the polyester/nylon mix actively works to move moisture to the outside and keep you dry, so this tight is comfortable at both colder and warmer temperatures than your traditional tights. The Thermoflex Core2 fabric is quite compressive, so we mix it with our standard Thermoflex, which has a higher modulus of stretch for the perfect balance between stretch and compression. We've added our lumbar compression band to help keep this tight firmly in place around the waist. The ankle zips are YKK® Camlock® and covered with reflective tape for night visibility. Now you're ready to put in those long base rides all winter long.

BLUSTERY WEATHER? NO PROBLEM

This product was made for the conditions of Flanders in February. Or basically any month in Flanders between September and May. High-loft fleece on the inside provides warmth to spare, and you'll love the softness on your skin with the excellent moisture management of this 100% multi-denier fabric. It's stretchy for a perfect fit, and the flat-lock seams add an extra touch of quality.

Prosecco mid-weight fabric to keep you dry with a bit of insulation as well

Cut to fit under any Castelli jersey Flat seams

EXTENDED USEFULNESS

The Prosecco base layers are our mid-weight option and are made to wick moisture away from your body while adding a moderate amount of insulation. This all-around base layer can be used under a short-sleeve jersey to extend the comfort range to those first cool fall days, or even under a full jacket for your intense cold-weather training sessions.

Ideal for cool conditions when you need an extra layer under your jersey

100% polyester 3D mesh fabric

Reduced seaming at shoulders for extra comfort

Double layer construction at neck

DRY IS GOOD

This is the piece our pros requested for those inbetween conditions where the Prosecco R is too warm and the Pro Mesh is too cool, like Spain in February or Belgium in April. You're not looking for warmth from your base layer, just something to move the moisture away from your body and help your race jersey perform. Our 3D mesh fabric creates dead air space next to your skin, while the polyester capillary action moves sweat away.

001

CHAMOIS DRY LUBE 8800100

Moist skin is softer and more susceptible to abrasion, as any rider who has done a long race in the rain can attest. Our dry lube reduces friction without weakening the skin through moisturizers. We also use 100% natural tea tree oil for antibacterial and antimicrobial properties to help prevent infections and saddle sores.

001

FOUL WEATHER CREAM 8800102

This cream is designed to protect your skin from wet, dirty conditions. It is not petroleum based and won't damage the fabric of your bike shorts. It is also easier to clean off with soap and warm water.

001

WARMING EMBRO CREAM 8800101

Thiscreamcreates awarming sensation that helps "wake up" muscles on cooler days or can also help relieve sore muscles. We used mostly natural ingredients to create a strong warming sensation but without the burning feeling that you get with some products. This cream can be used underneath the Foul Weather Cream for racing in cold and wet conditions.
