THE NEXT GENERATION

We've had a close-up view of the emergence of the next generation of Team Ineos stars like Egan Bernal, Pavel Sivakov, Chris Lawless and Tao Geoghegan Hart. These guys draw on the massive Team Ineos experience while bringing the passion, discovery and curiosity of youth.

That's what you'll find in these pages, and every year with Castelli. The next generation of performance cycling clothing. Here you'll find the same aero TT and road suits and lightweight climber's jerseys as used by our pro riders, and even the protective Free Protekt, which protects the hips in situations where there's a higher likelihood of coming off, like in the chaotic opening stages of a grand tour. These are products that come from the combined know-how of Castelli and Team Ineos.

But it's not just about pro racing. Castelli means speed and emotion, and we bring both to all kinds of riding. Unlimited is the name we've given to our new all-surface gear: Castelli performance with no compromises, but with added durability and convenience for fast riding on any surface or tire size. Our new Superleggera group brings innovation in fabric construction to make lighter, cooler but more comfortable jerseys and shorts for your next mountain adventure.

THIS IS THE FUTURE OF CYCLING CLOTHING.

M E N ' S

THE ULTIMATE RACE SUIT

The Sanremo Speed Suit revolutionized the way pro riders dress when we invented it back in 2011 and we're still surprised that every other manufacturer has simply copied the Sanremo front opening rather than trying to come up with something original.

While the front opening is the most visible part, we've worked on every other detail to make this the perfect race suit. It's aero thanks to our CFD based seaming and wind-tunnel selected fabrics. It's comfortable thanks to the body fabrics that will keep you dryer and cooler than some of the simple Lycra fabrics used by some other companies. The lower portion of the suit is our Free Aero Race 4 bibshort, our most comfortable suit for your longest, toughest race days.

Besides the new fabrics and seam placement we've also worked on the pockets to make them better for racing. They're somewhat narrower for better aerodynamics but there are now 2 big pockets instead of 3 small ones, so they're easier to access in racing.

YOU’LL THANK THE UCI

If we could we would keep this suit an industrial secret, a competitive advantage for our pro riders. But the UCI rules say we have to make it commercially available to keep the playing field even for all teams. So here it is. We don’t want to give away too many of the secret details that make it so fast, but there are a few details that you can see: amazing fit in the TT position, slippery fabrics, reduced seaming, and long legs with flat endings and flat grip tape to keep them in place. The long sleeves have a thumb loop to prevent them from riding up. There’s a window pocket on the back so you can place the race number out of the wind — and the window stretches and breathes, unlike others on the market. Hundreds and hundreds of hours have gone into engineering this suit. We don’t say how many because we haven’t even tried to keep count. We have access to the test facilities at the Norwegian Technical University in Trondheim, where our detailed process addresses fabric selection and suit construction. This suit was made for WorldTour riders. It’s optimized for speeds above 45 km/h and for extreme positions. At those speeds and with the right setup it’s the fastest suit we’ve ever tested. Thanks, UCI.

MEN'S SHORTS

BIBSHORT CHART

THE RIGHT SHORTS MAKE A DIFFERENCE

When it comes to performance cycling, whether it's long weekend rides, road races or granfondos, bibshorts are where it's at for outright comfort. A perfect pair of bibshorts will provide just the right balance of comfort and support for your legs when you're pounding out those kilometers.

PROGETTO X²
SEAMLESS

Pro-level seat pad for maximum comfort. New seamless skin-care layer is softer against the skin and reduces abrasion. Separate saddle-shaped cushioning layer with progressive damping through high-density foam and gel inserts.

KISS AIR²

High-performance seat pad for all conditions. Single-piece construction with infinitely variable thickness. Updated in 2019 with more supportive padding and a softer, stretchier fabric next to the skin.

EVERYTHING WE KNOW
ABOUT COMFORT

This short is the result of decades spent working to make long hours in the saddle ever more comfortable. The fabric is our high-stretch Forza fabric. The 38% Lycra® content means that it's gently compressive while never binding. And it maintains an insanely soft hand. The nearly seamless construction is derived from our Body Paint shorts, which debuted a decade ago and started the trend of reduced seams while maintaining remarkable fit. Nothing to rub or break. The renowned Progetto X² Air Seamless seat pad gets an update in this season with a new skin care layer that features a remarkably soft new surface fabric and more stretch, which allows us to eliminate the front triangle. We also obsessed over every other little detail, like the new bib construction and even new silicone logos that stretch with the base fabric and recall the logo location of the first Castelli Aero Short from the late '70s, the short that started it all

LIGHT, COOL
AND STRAIGHT OUT
OF THE FUTURE

We've been pushing the envelope on lightweight shorts since 2011 but have butted up against the limits of compromising durability for ever lighter weight. We needed to step back and find a better way. We examined what the short really needs to do: it needs to hold the seat pad securely in place while otherwise adding as little weight or fabric as absolutely necessary (without being transparent, obviously), and it needs to last a season of hard use. So we engineered a brand-new fabric using a woven rather than a knit that shaves 30% in weight for the same level of support and non-transparency. Then we worked with the world's leading mill to construct a gradient fabric that becomes increasingly lighter the farther down the leg it extends, with the last part weighing a mere 90 g/m² compared to normal short fabric, which weighs around 220 g/m². This fabric, while being insanely light, maintains a decent durability along with excellent abrasion resistance, at least against the saddle. We don't guarantee it against unplanned slides across the asphalt, so please keep the rubber side down! Note that while the short saves a mere 48 grams while dry, this means it also absorbs around 30% less moisture when you're sweating. So when you're sweating your way up the Alpe d'Huez you're actually saving closer to 150 grams. This short doesn't compromise on comfort. We use our top Progetto X² Air Seamless seat pad, the spectacular striped mesh bibs from the Free Aero Race 4 Bibshort and a flat stretch woven leg gripper to keep everything in place.

- Flat-lock stitching
- Progetto X² Air Seamless seat pad

P R O T E K T

Enhanced road rash protection without adding bulk or uncomfortable padding.

Every cyclist knows that the hip is the most exposed part of the body. We made this short to be more durable and significantly reduce abrasions if you slide out, whether it's on loose gravel or in the last corner when you're going for the win at your local crit race. The protection adds minimum weight, you don't really feel it except in very hot weather, and it's limited to the hip panel.

STRONG OUTER FABRIC

This sturdy fabric increases the chances that you can just brush yourself off and not have to throw away an expensive pair of shorts.

FABRIC-ON-FABRIC SHEAR

A major cause of the burns on your hip is the shear force when the head of the femur hits the ground and that force is absorbed by your body. We use two layers of fabric (a variation on the old track rider trick of wearing two pairs of shorts), which lets the shear force slide between the fabric layers.

DYNEEMA® REINFORCEMENT

The inner layer of fabric features a Dyneema® ripstop construction to help prevent the fabric from tearing in more serious falls. It's the same fiber used in climbing ropes and bulletproof vests.

THE UNLIMITED
TOUR DE FRANCE
GRAVEL SHORT

This short was initially made specifically in response to a request from Chris Froome to help protect him through the first dangerous stages of the Tour de France. He wanted something to reduce road rash in case of a crash on those stages when everyone wants to be at the front and crashes are frequent.

We went back to the old trick, familiar to track riders, of wearing two pairs of shorts, knowing that Lycra® sliding on Lycra® is the best way to prevent or reduce road rash on your hip. In this case we've used our Vortex fabric from the Free Bibshort on the outside, which we know is already extremely durable in everything from sliding across the pavement to dog bites (yes, really!). Then we added an internal layer of a stretch woven fabric reinforced with a ripstop grid made from Dyneema®, the same miracle yarn used in rock climbing ropes, reinforcement in sails for the America's Cup, and in bulletproof vests. This will help prevent the inner layer from ripping in many situations. We put this dual-layer construction over the side panel, which gives generous coverage for the hip and thigh in the event of a crash.

While originally created to help Tour de France riders survive the first few stages of the race better, this short may come in handy when you're riding on loose gravel or in your local criterium, or even if you just happen to fall off frequently and always slide on your hip like our favorite GCN presenter.

Beyond the protective aspect of this short, we've constructed it using the components and construction from our Free Aero Race 4 Bibshort, our top race bibshort that also gives remarkable comfort.

METICULOUS EVOLUTION

The Free Aero Race 4 Bibshort is our top race short, which also means that it's insanely comfortable even if you never pin on a number.

The original Free Aero Race Bibshort was first introduced over a decade ago and has logged literally millions of kilometers under the backsides of our sponsored pro riders and has been the best-selling short both in the Castelli retail collection and in our Servizio Corse custom program. Over this time the short has undergone numerous updates and improvements in the never-ending quest to create the best short we can make. While the basic concept of a minimalist workhorse pro-level comfortable race short remains, every single fabric, component, stitch and construction method has been updated and improved over time.

The fourth major generation of the short features the updated Progetto X² Air Seamless seat pad. This pad separates a soft, stretchy skin care layer that moves with your body from a generously padded cushioning layer that replicates the form of your saddle. Eight-hour rides are no problem.

Of course the fabrics are premium, made to our specifications by Italy's best fabric suppliers. The Forza fabric on the inner leg features 38% Lycra® content for perfect fit, while the Vortex fabric on the side panels is dimpled for aerodynamics. And it's held in place by the latest iteration of our seamless flat Giro leg gripper.

DON'T LIMIT YOURSELF

We made this short to meet Castelli's high standards for comfort and performance in a cycling short while adding a few extra features that come in handy for riding on any surface. You'll find our normal exceptional fit as well as the KISS Air² seat pad, which provides generous anatomically placed padding with an exceptionally soft top layer. What makes this short special is the extremely durable Unlimited Lycra[®] fabric. It has higher abrasion resistance and tear resistance while not compromising on stretch, moisture management or comfort. In addition, we use double-layer side panels for the old track rider's trick of fabric-sliding-on-fabric should you fall. This short isn't really meant to be indestructible, but it significantly increases the chances that sliding out on gravel will mean you need to just brush yourself off rather than having to buy a new pair of shorts. That second layer on the side panel also makes for convenient side pockets, with a flap over the top to prevent the contents from falling out. For added convenience while riding on and off road, you have two mesh pockets on the lower back that compress gear next to your body to keep it from bouncing around. This short adds durability and storage without compromising comfort — for unlimited amounts of fun.

THE THRILL
OF COMPETITION

We made this short to incorporate as much technology as possible from our top-of-the-line pro-level race shorts at a more accessible price. And although it's certainly capable of week-end racing, it's also a great comfort performance short even if you never pin on a number.

The main Vortex textured fabric and the GIRO⁴ leg gripper come straight from our top Free Aero Race 4 Bibshort, while the KISS Air2 seat pad has most of the comfort of our top seat pad but represents maximum value. The intangible part that you'll appreciate most is our knack for building in perfect fit, thanks to the Castelli pattern engineering team.

This is the short that brings the best of Castelli's know-how in building comfort performance shorts into an accessible product in your cycling wardrobe.

IT JUST WORKS RIGHT

Castelli has innovation in our DNA, and we've brought you most innovations in cycling shorts over the years: the first Lycra® shorts on the market, the first synthetic seat pads, the first anatomical seat pads, the first minimalist and flat bib straps, and the first flat leg grippers. All these have become industry standards, and we keep pushing and innovating in our high-end shorts. The Entrata short is where we bring all that knowledge and experience into a short that just plain works. The fabric is just the right weight with just the right stretch and with a matte finish that looks just right. The KISS Air2 seat pad is just right, as is the GIRO3 leg gripper. And the short fits just right because we obsess over the fit of every short we make. We wanted this short to be just right for many years to come, so we stitch on the logos and stitch in the reflective panels on the back. There are no logos to peel off, and everything is stitched down securely. This short gives you every reason to step up to Castelli.

MEN'S UNLIMITED

OMNES VIAE

UNLIMITED

We've been riding on gravel since before it was a thing. Maybe that's why we don't really like the word "gravel." It's not a separate sport, and we think that in a few years we'll go back to just calling it cycling. You're still riding fast and challenging yourself as well as your friends. It's just that now your tires are more durable, and that opens up new trails and unpaved roads. The effort is the same as always, but now it's even more fun.

That's our approach with the new Unlimited group of products. Take away the limits of having to stick to paved roads. We try to give you the comfort, convenience and breathability you expect from Castelli, but we've built in extra durability against things like branches that pull yarns in your jersey, and we've used stronger fabrics in the shorts in case you slide out in loose gravel. There are a few extra pockets and muted colors that manage to look good both on and off road.

JUST DON'T LIMIT IT TO GRAVEL.

OMNES VIAE

070
DARK STEEL BLUE

UNLIMITED
AND UNCOMPROMISING

We’re not crazy about the word “gravel.” We love riding on it, but we don’t like the way the cycling industry acts like it’s a new sport. We prefer to just call it cycling because we’re still riding bikes, we’re still working up a sweat, we’re still having fun and we’re still beating up on our friends.

Castelli’s approach to all-surface riding is called Unlimited. Our riding now is a mixture of paved and unpaved surfaces, but we’re riding just as hard and demanding just as much from our clothing.

The Unlimited Jersey uses everything we know about moisture management, fit, shape, and the convenience of zippers that open easily and pockets that are the right shape and in the right place. But on this jersey we took the extra step of using fabrics that better resist snags from tree branches or vines that you’ll find on your favorite trail. The main body fabric is a polyester knit with good stretch and moisture management but better durability than the typical fragile fabric that’s OK on the road. Then on the sleeves, shoulders and back panel we use a stretch woven fabric that is extremely resistant, since this is the area that most often gets snagged.

You’ll just be comfortable like you always are in Castelli, but you’ll look good all season long.

860
VORTEX GRAY

089
FOREST GRAY

UNLIMITED

FUORI JERSEY 4520024

SIZES: XS-3XL	RACE FIT
WEIGHT: 151 g (Large)	BREATHABILITY
18°-32°C / 65°-90°F	LIGHTWEIGHT

- The all-surface unlimited no-compromise jersey
- ProSecco Unlimited main body fabric
- Snag-resistant stretch woven on sleeves and shoulders
- No-sew flat-edge sleeve finishing
- 3 rear pockets
- YKK® Vislon® zipper
- Silicone gripper elastic at waist

YOU WON'T EVEN NOTICE

We've been riding our bikes on gravel since before it was a thing, and we've always done it in our normal Castelli jerseys. The only complaint was that the occasional branch or vine could pull the delicate fabrics, and after a few rides the jersey wouldn't look exactly pristine.

That's what we focused on with the Fuori Jersey. It compromises nothing in terms of fit, comfort, moisture management and light weight, but we've used fabrics that offer additional protection from snags. The arms and shoulders are most exposed, and here we've used a stretch woven fabric that fits great yet is extremely protective. The main body is closer to a traditional jersey fabric but fared best in our snag and Velcro tests.

We don't call this a gravel jersey because it's equally at home on the asphalt, but if you do take it on your favorite trail it'll hold up better than any road jersey, and better than most off-road gear.

THE FIRST AERO JERSEY
PROJECT WAS CALLED
SPLIT SECOND

When Castelli engineered the first aero jersey for road racing back in 2006, everyone thought we were crazy. Back then, aero was only for TTs. Performance clothing meant moisture management. And you could win the Tour de France with a baggy jersey that was little more than a polyester T-shirt. Even our aerodynamic consultants expected limited gains, so we named the jersey Split Second, though, like now, we thought even small gains were worth pursuing. In the end the gains were pretty substantial, and we completely revolutionized the look of the pro peloton.

We're now on the sixth major revision of our aero jersey. Each generation has become more aero and better fitting. The Aero Race 6.0 benefits heavily from CFD analysis of wake flow in the riding position for fabric and seam placement. It also benefits from Team Ineos riders' feedback, as we've worked to make the jersey comfortable for their long hours of training and then racing in every possible weather condition.

Version 6.0 is our most aero and most comfortable Aero Race Jersey yet. But we're already at work on 6.1...

CLIMBER'S 3.0 JERSEY 4520012

LIGHT, DRY AND FAST

Racing in the Alps in July is for a select few, but the products that come out of that experience are absolutely amazing for the rest of us. We made this jersey with Team Ineos for the rigors of pro racing in hot weather and in the high mountains. It's extremely lightweight and features open fabrics for additional airflow and quick drying. And by using the same patterning as the Aero Race Jersey, we make sure you get maximum aerodynamics as well. Even if you don't race over the Galibier this summer, you'll love the soft stretch and great fit of this jersey, and you'll appreciate how it keeps you cool on the hottest days. Maybe you'll even do like the pro riders do and use it on wet days because it doesn't soak up any moisture. And you'll certainly appreciate that the fabric on the back blocks more than 90 percent of UV rays.

SIZES: XS-3XL	RACE FIT

THE EPIC RIDE JERSEY

This is the jersey for your big days in the saddle. It's a high-performance piece of equipment that values comfort and utility, not just pro race aerodynamics and minimalism. The main body fabric is a polyester blend with just a bit of Lycra® for perfect fit and moisture management. It's actually based on the same Velocity Rev3 fabric we use in our Aero Race Jersey, but we gave it about 20% more body for all-around performance and to better support the pockets. We use a 3D mesh through the back, along with a flat mesh on the side panels. The pockets are bit larger than those on our race jerseys, for extra carrying capacity, and there's a zippered pocket for keys and money. We use a YKK® Vislon® zipper for easiest sliding when closing or opening and our Giro® elastic waistband to distribute the load. The sleeves are cut long.

ESPRESSO JERSEY

We applied the Espresso name to a winter jacket a few years ago mostly because it sounded fast and Italian, without really thinking how a perfectly pulled Espresso is a work of art, something apparently so simple but at the same time the result of painstaking attention to the details. That's the thinking behind the Espresso jersey. Simple and clean looks on the outside but careful attention to the construction, from our new Punto fabric with exceptional softness and breathability to the front zippered pocket for your cash and credit card. We invented a new rear pocket construction that lays flat but can bellow out for high carrying capacity when needed. In fit and finish this jersey is designed to complement the Premio bibshort.

THEY'LL THINK
YOU BOUGHT IT
JUST TO LOOK GOOD

This is the jersey that brings Castelli's fabric and construction engineering together in one of the most refined jerseys we've ever made. The goal with this jersey was to make it as light as possible without sacrificing transparency, sun protection and convenient features like a zippered key pocket. We've brought in a new fabric that we call Oltre, which roughly translates to "beyond," and it really goes beyond what you normally find in a jersey, with the horizontal stripes giving great breathability and stretch while providing good support for the pockets.

The jersey will do double duty in your wardrobe: It's the jersey to reach for on hot days or big climbing days in the mountains. But it's also the jersey you'll pull out when you just want to look good, thanks to the no-sew construction around the sleeves and hem and the close attention to detail in every stitch, seam and component.

It's designed with a fit that is close to body but slightly more relaxed than our race jerseys.

THE EPIC RIDE JERSEY

This is the jersey for your big days in the saddle. It's a high-performance piece of equipment that values comfort and utility, not just pro race aerodynamics and minimalism. The main body fabric is a polyester blend with just a bit of Lycra® for perfect fit and moisture management. It's actually based on the same Velocity Rev3 fabric we use in our Aero Race Jersey, but we gave it about 20% more body for all-around performance and to better support the pockets. We use a 3D mesh through the shoulders and back of sleeves, along with a flat mesh on the side panels. The pockets are bit larger than those on our race jerseys, for extra carrying capacity, and there's a zippered pocket for keys and money. We use a YKK® Vislon® zipper for easiest sliding when closing or opening and our Giro³ elastic waistband to distribute the load. The sleeves are cut long.

IT NEVER GETS EASIER;
YOU JUST GO FASTER

We've incorporated a lot of our pro racing technology into this all-around performance jersey. The base fabric is a textured 100% polyester that provides excellent wicking to keep you dry in a wide range of conditions. We've wrapped our AirMesh fabric around the shoulders and down into the sleeves and side panels to give extra stretch so the jersey doesn't constrict or make you look like you should have bought a size larger. The mesh side panels have a Castelli outline print, while the overall graphic stays clean and sophisticated.

HERITAGE

As supplier to the Italian Cycling Federation, we are bringing back a more classic look to the national team. It's a throwback to the years of Fausto Coppi but with a modern twist. The poly/wool fabric is as light as a modern synthetic fabric but with great moisture management and a distinct look. The logos are applied embroidered patches, the metal zipper pull is in the form of the Italia flag, and even the internal elastic is done in the tricolore. It's a classic-look performance jersey to celebrate everything you love about this sport.

PRO-LEVEL BASE

The pro cyclists we work with know the importance of the right base layer for the conditions. The Pro Mesh is made for the widest range of conditions and is designed to keep you dry in cool to mild temperatures. We'll even put it under a Flanders Warm base layer in the coldest conditions. We've given it a graphic print so you can show off that you have something special when you open your jersey zip.

ACTIVE COOLING SLEEVELESS 4520030

SIZES: XS-2XL	WINDPROOFNESS
WEIGHT: 84 g (Large)	WATERPROOFNESS
25°-35°C / 68°-95°F	INSULATION
	BREATHABILITY
	LIGHTWEIGHT

Base layer to cool you on hot days

Polartec® Delta fabric features regulated drying so that the evaporative effect cools your core

Sleeveless design with minimalist construction

Sublimated overprint

COOLING TECHNOLOGY

By using hydrophilic and hydrophobic yarns, this base layer holds a bit of moisture next to your body while allowing free airflow through the fabric, thanks to the special open knit. You get evaporative cooling directly on your skin. We recommend using this with our coolest jerseys, like the Climber's or Superleggera, though it will work under any breathable jersey.

CORE SEAMLESS BASE LAYER 4520031

SIZES: SM/LX/2XL	WINDPROOFNESS
WEIGHT: 45 g (Large)	WATERPROOFNESS
15°-25°C / 59°-77°F	INSULATION
	BREATHABILITY
	LIGHTWEIGHT

Seamless lightweight drying layer

Ideal for cool to mild conditions when keeping yourself dry is the priority

Unique mix of polyester and polypropylene provides maximum moisture management with significantly lighter weight

Seamless construction gives exceptionally stretchy fit

MIRACLE LAYER

We've never been happy with the traditional nylon/Lycra® construction of most seamless base layers, which tend to hold a lot of moisture. We engineered this Core Seamless with a mixture of polyester and polypropylene that moves the moisture away from your body with absolutely minimal moisture uptake. The fabric is soft next to your skin and provides great temperature regulation in mild conditions. It's not for hot temperatures but it does work as a first layer even into cooler temperatures, while the seamless construction keeps it extremely comfortable next to your skin.

CORE MESH 3 SS 4517027
CORE MESH 3 SLEEVELESS 4517028

SIZES: SM/LX/2XL	WINDPROOFNESS
WEIGHT: 88g (Large)	WATERPROOFNESS
20°-25°C / 68°-77°F	INSULATION
	BREATHABILITY
	LIGHTWEIGHT

Magic Mesh 90% polyester, 10% Elastane wicking fabric

Minimalist lightweight construction

Reduced seams for maximum comfort

WARMER CONDITIONS

This is our base layer for the warmest conditions. The mesh is open to create a space on the skin for sweat to evaporate. The 10% elastane content makes it very stretchy and helps in the moisture retention so that you're always getting evaporative cooling.

001
WHITE

001
WHITE

PRO ISSUE SS 4515537
PRO ISSUE SLEEVELESS 4515538

SIZES: XS-2XL	WINDPROOFNESS
WEIGHT: 48g (Large)	WATERPROOFNESS
10°-25°C / 50°-77°F	INSULATION
	BREATHABILITY
	LIGHTWEIGHT

- 100% polyester 3D mesh fabric
- Reduced seaming at shoulders for extra comfort
- Wider collar to fit under aero jerseys
- Flat waist hem to lie flat in shorts

DRY IS GOOD

This is the piece our pros requested for those inbetween conditions where the Flanders is too warm and the Core Mesh is too cool, like Spain in February or Belgium in April. You're not looking for warmth from your base layer, just something to move the moisture away from your body and help your race jersey perform. Our 3D mesh fabric creates dead air space next to your skin, while the polyester capillary action moves sweat away.

EXTENDED USEFULNESS

The Prosecco base layers are our mid-weight option and are made to wick moisture away from your body while adding a moderate amount of insulation. This all-around base layer can be used under a short-sleeve jersey to extend the comfort range to those first cool fall days, or even under a full jacket for your intense cold-weather training sessions.

FOR THE LOVE OF THE GLOVE

The Icon Race Glove was designed for the cyclist seeking all the benefits of wearing gloves but without any of the restrictions. Protection, grip, comfort and looks: check, check, check and check. You'll never want to not wear gloves again.

The Castelli Damping System was designed and engineered to address a common problem many riders suffer from: discomfort and occasional numbness in the hands associated with extended periods of time gripping the handlebar. We carefully mapped key parts of the hand in order to create optimal protection from steady road vibrations. The result is our unique palm construction that features a combination of protective materials and cushioning foams. The Castelli Damping System is applied across many styles in our glove collection and provides outstanding control and comfort during training or racing.

LET THE AIR FLOW

When we set out to create the lightest glove in the pro peloton, our design and engineering teams focused on reducing weight and enhancing comfort. We identified the key handlebar positions and strategically placed the Castelli Damping System on a highly abrasion-resistant base material as an extra layer of protection for the nerves in the hands and to reduce road vibration. We reduced weight and increased airflow by removing unnecessary material covering the thumb and back of hand. The result is a full-protection glove with great padding and maximum airflow with a feel of riding with bare hands. The perfect glove for racing or your favorite training ride.

COMFORT
MEETS VERSATILITY

These gloves were designed for those days when you're looking for a little protection from brisk early morning temperatures or from the rugged vibrations of a gravel road but you don't need anything more. The side stretch panels make them super easy to get on and off, and they are incredibly compact, so they're also perfect for those days when you'll start with gloves and stash them in your jersey pocket mid-ride.

COMPETIZIONE GLOVE 4520035

SIZES: XS-2XL
WEIGHT: 27 g (Pair)
15°-32°C / 59°-90°F

- Stretch mesh fabric to keep your hands cool and comfortable during the race
- Moderately light padding with essential placement
- Silicone grip on palm
- Castelli Damping System (CDS) protects median nerve
- Easy on and off with high-stretch cuff

010
BLACK

NO FUSS, NO MUSS

Sometimes you just want a glove that covers the basics: a little padding but not too much, a bit of protection in case of a fall, a glove you'll forget about while on the bike, and a glove that looks good with the rest of your kit.

ENTRATA GLOVE 4518016

SIZES: XS-2XL
WEIGHT: 34 g (Pair)
15°-30°C / 59°-86°F

- Synthetic palm with medium density foam padding
- Microsuede nose wipe at thumb
- Velcro closure
- Extreme moisture management fabric back to keep hands dry

023
RED

THE RIGHT GLOVE FOR YOU

If you don't need a lot of padding and just want a glove to protect your palms on the bars or in case of a tumble, this glove has you covered. We use an synthetic palm to keep it soft and a micro-mesh back of hand to keep it cool. Velcro adjustability means it's relatively easy to get on and off.

LIGHT BUT SURPRISINGLY WARM

Our Lightness Glove has been a perennial favorite, but now we've updated it with better fit, easier on/off, better grip and better padding. We've kept the same brushed fleece back of hand that gives just the right amount of warmth without overheating. And we've added the Castelli Damping System padding and an innovative wrist cuff to make ingress and egress easier than ever.

Castelli's Fast Feet project – for time trials
Developed with Team Ineos for the fastest foot covering for time trialing
Silicone-coated stretch fabric over the shoe smooths out airflow
Engineered grooved Lycra® in the ankle portion helps detach airflow
Flat polyurethane tape at the top to keep shoecover in place

010
BLACK

Castelli's Fast Feet project: aerodynamic foot coverings for every condition. The TT shoecover is designed for maximum aerodynamics in time trialing, within the limits of the UCI rules. We developed it through CFD analysis followed by extensive fabric and on-bike wind tunnel testing. The smooth silicone-coated foot portion smooths out the shape of the foot, while the grooved leg portion helps detach the air as it flows around the leg. The shoecover is cut high, reaching to the calf. There's no reason not to wear it on the road, but its gains are maximized at TT speeds.

Silicone-coated smooth waterproof stretch fabric
Step-down trip strips on side of leg help detach airflow
Seam sealed to keep water out
YKK® rear zipper
Reflective details

010
BLACK

Castelli's Fast Feet project: aerodynamic foot coverings for every condition. The road shoecover is made for racing and training in cool conditions and combines aerodynamics with full wind protection and good water protection. The silicone-coated stretch fabric smooths airflow over the feet while keeping out wind and rain. The ankle seam is taped to further enhance water protection, while the cuff has a silicone bead to prevent water from entering from the top. It's not insulated, so it's not made for cold conditions, but from 8 °C/45 °F and up it offers good protection while maximizing aerodynamics.

- Easy-on pull tab

010
BLACK

ALL-AROUND PERFORMER

The exceptional stretch of our high-quality 3mm neoprene fabric makes this bootie comfortable for both wet and dry conditions. It keeps the wind off while providing a good bit of insulation. If you should get caught in wet conditions, the sealed seams and waterproof zipper help keep the rain out.

TOE THINGY 2 4518093

- Rugged, rubberized sole with openings for cleats
- Red fabric on inside
- Can be worn on its own or as a layer between your shoe and shoe cover

010
BLACK

DESIGNED FOR THOSE SLIGHTLY COOLER DAYS

Keep your feet warm without the hassle of a full shoe cover. These toecovers slip easily over the front of your shoes and are held in place by the cleats. The rugged underside of the toe will add grip and resist rips or tears thanks to a silicone print. The toecover can be worn on its own or as a layer between your shoe and shoe cover.

DILUVIO 2 ALL-ROAD SHOE COVER 4516538

- High-durability panel under foot
- Adjustable Velcro closure under foot adapts to wide range of footwear
- Heavy-duty rear zipper

010
BLACK

ADDED FLEXIBILITY

Thanks to the open construction under the foot, this bootie can be used with road or MTB shoes so you can cover all your cold-weather rides. The seams are glued and we even finished the top edge to help prevent water from coming into the bootie. Reflective details on the back help make this the do-it-all bootie.

SLICKER PULL-ON SHOE COVER 4519528

SIZES: S-2XL	WINDPROOFNESS
WEIGHT: 81 g (Pair)	WATERPROOFNESS

- Super-stretch fabric allows easy on and off without a zipper
- Waterproof fabric will keep you dry in wet conditions
- Sealed seams for complete water protection
- Stretch fit and smooth surface for aerodynamics
- Reflective graphics

010
BLACK

SEAL OUT THE WEATHER AND GET AERO

We've taken a different approach to the traditional shoe cover. Making the waterproof fabric significantly more stretchy allows you to actually pull this bootie on over your shoe, but the lack of a zipper in the back makes it more comfortable and improves waterproofing. The smooth surface will help you stay aero in your next foul-weather road race.

<div>WEATHER CONDITIONS<div><div></div><div></div></div></div>		

- Solare fabric keeps the chill off without causing overheating
- UPF 50+ protection
- Polyester based for excellent moisture management
- Double-side silicone elastic at top for excellent grip

SURPRISINGLY USEFUL

We can officially only rate these warmers at UPF 50+, but in our laboratory tests they actually blocked 99.8 percent of damaging UV rays. We used a polyester base that is not only more effective than nylon at blocking UV rays but is also much better at keeping you dry, which means these arm sleeves are better in both cooler and warmer conditions. We've kept the construction very clean to eliminate seams that can rub, and we used our double-sided silicone elastic to make sure they stay in place. They fold up extremely small, so they're great to stick in your pockets for your next big mountain day.

A BETTER ARM WARMER

With Team Ineos we set out to make a better seamless arm warmer. Others on the market are made with a nylon/Lycra® blend that tends to hold moisture, but we knew we could get better moisture management with a polyester yarn. Working with polyester makes it more difficult to get the right stretch, return and manufacturing consistency, though. It took a year longer than we thought, but we're all glad we stuck with it. These warmers are a pro rider favorite because they're crazy light and they're extremely warm for their weight, yet even in milder conditions you don't overheat. They're so stretchy you hardly feel them on, yet when you take them off they occupy a fraction of the space that normal warmers would take in your pocket.

THE ULTIMATE
GORE-TEX®
CYCLING JACKET

Light, packable, highly breathable, durably waterproof and aero fitting. This is the first piece that brings all those features together into a jacket made for the rider who has to (or choses to) ride in any weather conditions. When GORE-TEX® introduced SHAKEDRY™ technology two seasons ago, we immediately saw the opportunity to make waterproof jackets lighter than ever. And then we tested it and realized that we're also able to make them more breathable than ever. Now, thanks to Gore's new Topo inserts we're able to bring a close fit and extreme packability to a jacket that's fully protective for all-day riding in the rain. We've given it two external pockets so you don't have to unzip to reach your jersey pockets. We've given it a longer tail to shield you from the spray coming off your back wheel. We've given it a soft neck liner. And we've given it reflectivity for safety. Compared to our Idro 2 jacket, this is more of a workhorse jacket. It's made for the rider who leaves his house for an all-day ride in the rain, for the rider whose jacket is a necessity and not a piece that stays in a pocket until it's needed.

READY IN CASE
OF EMERGENCY

Just like the name says, we wanted to create the ideal simple jacket. We made it completely waterproof and compact, and, as you’d expect from Castelli, we also gave it an amazing on-bike fit, yet it’s still roomy enough to fit over a Gabba. This jacket is an emergency piece, so we knew you wouldn’t want to break the bank with it, but the only real compromise compared to our top-of-the-line offerings is in breathability. We didn’t make this for an all-day rain ride, but it’s just right for your next emergency.

THE SMALLEST,
LIGHTEST GORE-TEX®
JACKET

This jacket can change the way you ride. It’s so small you’ll find yourself stuffing it in your pocket for rides with even a remote chance of rain, just because it takes up so little space. And you’ll be extending your rides into conditions when rain is in the forecast because you know you’ll be perfectly covered. Using Gore’s newest SHAKEDRY™ two-layer fabric, we constructed the most minimalistic jacket that still covers your needs. It fits over your jersey and vest. It covers your tail. It has a tall collar. It has a YKK® Vislon® waterproof zipper. It has reflectivity. But that’s about it. Compared to the Idro Pro jacket, this one is made to go in your pocket for every ride, yet still provide the essential protection when called into duty.

NOT YOUR OLD-STYLE WIND JACKET

If you're like us, there's a reason you're not using your old-style wind jacket more. With waterproof jackets like the Idro being lighter and more compact than ever, we felt it was time to reinvent a classic. In reality, the Aria Jacket is very different from your flappy old jacket that either didn't protect you or didn't breathe. This jacket is an impossibly light layer that keeps the wind off the front of your body while allowing ample breathability through the mesh side panels. But what you'll really appreciate is how we use the stretch panels in the sides and on the back of the sleeves to make this jacket fit like a second skin: no flapping fabric, no cold air circulating inside the jacket, no more looking like a throwback to the Armstrong era.

This jacket is light and warm enough to wear for the entire ride in mild conditions, but if you do want to take it off it folds into a side panel pocket and stuffs away in minimal space in your pocket or seat bag.

NEAR WEIGHTLESS PROTECTION

We have reinterpreted the classic wind vest to make it as svelte as the rest of your wardrobe. This vest is designed to completely block the wind on the front while allowing ample breathability on the back. The fabrics are so impossibly light that you'll be surprised at how much warmer you stay with this vest over your standard jersey. But the magic comes from the cut and the stretch fabric on the back, which take up all the loose fabric and make the vest fit close to body without feeling tight or looking ridiculous. When you're ready to take it off, the vest folds into its rear pocket and stashes away, taking up minimal space in your jersey pocket.

BIBSHORT CHART

THE RIGHT SHORTS MAKE A DIFFERENCE

When it comes to performance cycling, whether it's long weekend rides, road races or granfondos, bibshorts are where it's at for outright comfort. A perfect pair of bibshorts will provide just the right balance of comfort and support for your legs when you're pounding out those kilometers.

PROGETTO X²
SEAMLESS

Pro-level seat pad for maximum comfort. New seamless skin-care layer is softer against the skin and reduces abrasion. Separate saddle-shaped cushioning layer with progressive damping through high-density foam and gel inserts.

KISS^{AIR²}

High-performance seat pad for all conditions. Single-piece construction with infinitely variable thickness. Updated in 2019 with more supportive padding and a softer, stretchier fabric next to the skin.

**FOUR DECADES
OF EXPERTISE**

Our lead product developer was 16 years old when she started her first job making buttonholes in the pockets of Castelli wool shorts in a factory just outside Milan. Soon she was stitching in the real leather chamois and would then go on to manage the factory. Maurizio Castelli noticed her attention to detail, and he hired her away from the contract factory to head up quality control inside Castelli. Finally, she moved up to lead product developer, a position she has held for more than 20 years.

The Premio 2 Bibshort is a direct result of Sonia's four decades of experience. There are the obvious things, like developing the right fabrics and knowing how to stitch in a seat pad. But those years of experience also led her to combine a new grip application to a raw-cut edge to make a leg ending that stays in place with no binding whatsoever. Then there is the rich texture and ideal stretch of the bib straps, and the flattering lines of the minimalist cuts.

Working alongside Maurizio Castelli taught Sonia the value of constantly striving for perfection, attention to detail, and the art of bringing together craft and performance. That experience comes together in the Premio Bibshort.

MADE TO RACE

Typically, our women's garments are designed from the ground up for women.

However, the Free Aero 4 W Bibshort is designed from the ground up for racing. That specific goal leads us to a somewhat minimalist construction, but one that is made for aerodynamics and also comfort, since racing requires long hours in the saddle, both in training and on race day, resulting in one of our most comfortable shorts as well.

The Free Aero 4 W Bibshort represents a significant evolution from last year's model, our best-selling short ever. There's a new leg gripper that still features a lie-flat raw-cut edge but now has vertical silicone stripes to keep it in place without restricting stretch. The new fabric allows for better print quality for your custom team production, the same as Team Ineos is using. We've updated the seams to improve the fit and make the short look even better on the body. We've re-engineered the bib straps with new fabrics and construction so they stay cooler, lie flatter and are more durable.

The new Free Aero 4 W Bibshort also receives the updated Progetto X² Air Seamless seat pad featuring the softest surface fabric you've ever felt in a seat pad.

- Hidden side pockets
- Minimalist mesh bib straps to keep you cool
- GIRO® leg grippers to hold legs in place
- Progetto X² Air Seamless Donna seat pad for extra padding

DON'T LIMIT YOURSELF

We made this short to meet Castelli's high standards for comfort and performance in a cycling short while adding a few extra features that come in handy for riding on any surface. You'll find our normal exceptional fit as well as the Progetto X² Air Seamless Donna seat pad, which provides generous anatomically placed padding with an exceptionally soft top layer. What makes this short special is the extremely durable Unlimited Lycra® fabric. It has higher abrasion resistance and tear resistance while not compromising on stretch, moisture management or comfort. In addition, we use double-layer side panels for the old track rider's trick of fabric-sliding-on-fabric should you fall. This short isn't really meant to be indestructible, but it significantly increases the chances that sliding out on gravel will mean you need to just brush yourself off rather than having to buy a new pair of shorts. That second layer on the side panel also makes for convenient side pockets, with a flap over the top to prevent the contents from falling out. For added convenience while riding on and off road, you have two mesh pockets on the lower back that compress gear next to your body to keep it from bouncing around, This short adds durability and storage without compromising comfort — for unlimited amounts of fun.

SPEEDY ENDURANCE

This is our midrange performance short, great for a long endurance ride or a quick hour workout indoors or out. Our Endurance Evolution fabric is a high-modulus, very matte Lycra® fabric that feels extremely dry while providing just the right amount of compression. The waist construction eliminates stitching and elastic and lies completely flat. At the leg ending we use a raw-cut edge with vertical silicone strips just like on our top-of-the-line Premio shorts to keep the leg in place without the pressure that creates the dreaded sausage effect. A great short needs a great seat pad, and the women's-specific KISS Air² pad will keep you comfortable without being too bulky.

A BETTER SHORT

Shorts are an obsession at Castelli. They're the most vital piece of clothing and one of the hardest to get right. Even though the Prima is our entry-level short, it shows that we won't compromise anything for comfort and performance. It starts with the women's-specific KISS Air² seat pad. Just the name gives an idea of the process of constant improvement, which started with a soft KISS pad that was improved by making it more breathable (Air) and then improved again in the latest update to use the softest-ever top fabric (2). It's ready for your next big ride indoors or out.

We've updated the fabric to the new Pro Dry Soft, which has a smooth matte finish that feels cool on the skin while being very supportive and quick to dry.

We wanted this short to be just right for many years to come, so little details like the reflective patches are stitched in instead of being glued on, and the Giro³ elastic has the grip woven right into the fabric.

This attention to detail — go ahead and call it an obsession — is why Castelli's entry-level short is just a better short.

SANGRIA

YOU WON'T EVEN NOTICE

We've been riding our bikes on gravel since before it was a thing, and we've always done it in our normal Castelli jerseys. The only complaint was that the occasional branch or vine could pull the delicate fabrics, and after a few rides the jersey wouldn't look exactly pristine. That's what we focused on with the Unlimited Jersey. It compromises nothing in terms of fit, comfort, moisture management and light weight, but we've used fabrics that offer additional protection from snags. The arms and shoulders are most exposed, and here we've used a stretch woven fabric that fits great yet is extremely protective. The main body is closer to a traditional jersey fabric but fared best in our snag and Velcro tests. We don't call this a gravel jersey because it's equally at home on the asphalt, but if you do take it on your favorite trail it'll hold up better than any road jersey, and better than most off-road gear.

WOMEN'S JERSEYS

THE FIRST AERO JERSEY PROJECT WAS CALLED SPLIT SECOND

When Castelli engineered the first aero jersey for road racing back in 2006, everyone thought we were crazy. Back then, aero was only for TTs. Performance clothing meant moisture management. And you could win the Tour de France with a baggy jersey that was little more than a polyester T-shirt. Even our aerodynamic consultants expected limited gains, so we named the jersey Split Second, though, like now, we thought even small gains were worth pursuing. In the end the gains were pretty substantial, and we completely revolutionized the look of the pro peloton.

We're now on the sixth major revision of our aero jersey. Each generation has become more aero and better fitting. The Aero Race W Jersey benefits heavily from CFD analysis of wake flow in the riding position for fabric and seam placement. It also benefits from pro riders' feedback, as we've worked to make the jersey comfortable for their long hours of training and then racing in every possible weather condition.

It's our most aero and most comfortable Aero Race Jersey yet. But we're already working on an update.

MULTICOLOR BRILLIANT PINK

PURPOSELY OVERBUILT

The first thing you notice about this jersey is the graphic design and color. But take a closer look and you'll see how carefully it's been constructed. We start with great fabrics: the main body in ProSecco, combined with mesh side panels for extra breathability and stretch. Then we use our Velocity Rev2 four-way-stretch fabric on the sleeves, providing unmatched fit and comfort while allowing us to leave a raw edge for even greater comfort. We use our drop-tail pocket design to place the pockets at the perfect height, and finish it all with a YKK® Vislon® zipper that slides easier than any other. This jersey is so much more than its graphic.

SOAK UP THE SUN

Of course you should use good sun protection cream while wearing this top, but that's up to you. We made a top that lets you feel free on those beautiful summer days, but with a great technical fabric to keep you dry and comfortable and convenience features like a secure zippered rear pocket. It's great for hot days when you want to dress cool — although we wouldn't recommend it for long rides exposed to the sun.

UNENCUMBERED COMFORT

The Rosso Corsa Free Gloves are the result of us looking at the construction of existing gloves and asking why. And then setting out to find a way to make them better. The two most common areas of hand discomfort result from inadequate padding and from binding around the thumb and fingers while you're gripping the hoods. By removing the thumb from the glove, we eliminate any binding, increase comfort and reduce weight. And with the addition of the Castelli Damping System in areas of the glove that rest on pressure points on the bars, we protect the nerves in your hand for greater riding comfort.

ROUBAIX GEL 2 GLOVE 4520081

SIZES: XS-XL
WEIGHT: 41 g (Pair)
15°-30°C / 59°-86°F

Castelli's most padded women's glove in the collection
Castelli Damping System (CDS) protects median nerve
High-breathability back with perforation at palm
Anatomical neoprene cuff with embossed Velcro closure

HAPPY HANDS

We all know that hand pain is an easy way to ruin an otherwise excellent day on the bike, and that's exactly the scenario that these gloves will eliminate. The Roubaix Gel 2 offers our thickest gel padding and hand protection, so if you've ever had any hand discomfort, this is the glove for you. It's super comfortable to wear, has clean lines and looks great; it really checks all the boxes of a great summer glove.

PERFETTO VEST IS NOW
EVEN MORE PERFECT

The Perfetto Vest has been a favorite with everyone from our pro riders to Castelli staff to performance cyclists everywhere. But we wanted to make it even more perfect, so we developed a new exclusive GORE-TEX INFINIUM™ WINDSTOPPER® fabric that is both lighter and more water repellent than the old fabric while maintaining the stretch and breathability. We matched it up with better water repellency in the back while maintaining the breathability, and further improved details like the back pockets and reflectivity. A more perfect Perfetto Vest.

LIGHTER, MORE PACKABLE,
MORE BREATHABLE

The Perfetto Light started life as a request from our pro riders: “I want to wear the Gabba all the time, but sometimes it’s too hot.” So a somewhat lighter and more breathable Gabba became the Perfetto Light.

The Perfetto Light is improved in nearly every way: it’s now lighter, with thinner fabrics on the front and back, which make it easier to stuff in a pocket. It has both better rain protection and improved breathability. It has two larger pockets that better complement the three pockets on the jersey you wear underneath this jacket.

The new Perfetto Light is closer to a Perfetto Vest with sleeves, which makes it perfect for your spring and fall training and racing in cool conditions.

UNBELIEVABLY LIGHT

A jacket that weights less than a jersey? Real GORE-TEX®, no less? And it packs up to fit in half a jersey pocket? And it's the most breathable GORE-TEX® ever? Hard to believe, but it's all true. This jacket is a game changer. It's fully waterproof, as you expect from GORE-TEX®, but with its exceptional breathability and packability you'll find that it replaces all your other shell jackets. If your ride has the slightest chance of rain or a long descent or the possibility of temperatures dropping, this jacket will automatically go in your pocket. You can confidently do longer rides in conditions that you would have avoided with all your old jackets. While you can get this fabric from other brands, you can't get the Castelli fit, design and construction

EMERGENCY W JACKET 4517538

Deluge Light 2.5-layer waterproof fabric keeps rain off with 10,000mm water column
Slight amount of stretch for excellent fit in riding position
Folds into half a jersey pocket for emergency situations
Innovative “gutters” drain water away from hands and off back
Waterproof zipper and seam sealing keep all water out

032
YELLOW FLUO

READY IN CASE OF EMERGENCY

Just like the name says, we wanted to create the ideal simple emergency rain jacket. We made it completely waterproof and compact, and, as you'd expect from Castelli, we also gave it an amazing on-bike fit, yet it's still roomy enough to fit over a Gabba. This jacket is an emergency piece, so we knew you wouldn't want to break the bank with it, but the only real compromise compared to our top-of-the-line offerings is in breathability. We didn't make this for an all-day rain ride, but it's just right for your next emergency.

NOT YOUR OLD-STYLE WIND JACKET

If you're like us, there's a reason you're not using your old-style wind jacket more. With waterproof jackets like the Idro being lighter and more compact than ever, we felt it was time to reinvent a classic. In reality, the Aria Jacket is very different from your flappy old jacket that either didn't protect you or didn't breathe. This jacket is an impossibly light layer that keeps the wind off the front of your body while allowing ample breathability through the mesh side panels. But what you'll really appreciate is how we use the stretch panels in the sides and on the back of the sleeves to make this jacket fit like a second skin: no flapping fabric, no cold air circulating inside the jacket, no more looking like a throwback to the Armstrong era. This jacket is light and warm enough to wear for the entire ride in mild conditions, but if you do want to take it off it folds into a side panel pocket and stuffs away in minimal space in your pocket or seat bag.

030
DARK GRAY

NEAR WEIGHTLESS PROTECTION

We have reinterpreted the classic wind vest to make it as svelte as the rest of your wardrobe. This vest is designed to completely block the wind on the front while allowing ample breathability on the back. The fabrics are so impossibly light that you'll be surprised at how much warmer you stay with this vest over your standard jersey. But the magic comes from the cut and the stretch fabric on the back, which take up all the loose fabric and make the vest fit close to body without feeling tight or looking ridiculous. When you're ready to take it off, the vest folds into its rear pocket and stashes away, taking up minimal space in your jersey pocket.

MEN'S TRIATHLON

SET A NEW
PERSONAL BEST

This suit, which set a new course record at Kona in its first race with Cameron Wurf, uses everything we know to make your next long-distance race your fastest ever. In 2016 we started our aero research project with the Norwegian Technical University in Trondheim. Besides having a couple of brilliant professors and PhD students to come up with ideas and do the basic research, they have a couple of wind tunnels, rapid prototyping capabilities, CFD analysis and a true desire to make fast stuff. The first big success from the research was Team Sky's TT suit that placed four riders in the top eight at the opening Tour de France time trial. Then the UCI made it illegal. So this suit isn't UCI legal (but neither is your bike). It's faster than the pro cyclists' suits and very illegal due to the silicone ribs in the arms. The main body fabric is an impossibly light 50 denier — usually in sports clothing 40 denier is considered ultrafine. The legs and sleeves are long for aerodynamics, while the light fabrics are great for dealing with heat since they're thin enough to not get weighed down, yet the 8% Lycra® content holds a bit of moisture next to your skin for rapid cooling. The insane stretch allows us to make something that truly fits like a second skin on the bike but that doesn't restrict in any way on the swim or run. Our KISS Tri pad offers some welcome padding while you're on the bike but is thin enough to not bother you on the run. This suit offers real time savings on the bike leg while providing cooling and comfort on the run, but it was made with the expectation of being worn under a swimskin or wetsuit for the swim. It's optimized for high speeds — top age groupers or pro athletes, or anyone looking to set a new PR.

Second-generation Sanremo short sleeve suit is faster than ever

Velocity Rev2 main body fabric delivers aerodynamics with excellent fit and moisture management

Back fabric is our Velocity mesh for breathability, yet it blocks 94% of UV rays for significant sun protection (UPF 16)

Elbow-length sleeves with raw-cut edges for maximum comfort and aerodynamics

Castelli's Sanremo front opening makes it easier to bend for cycling and straighten out for the run and swim, while also allowing for easier nature breaks or opening up for extra-hot runs

2 rear pockets lie flat in the swim but allow generous room for nutrition

New short construction fits more securely with more muscle support

GIRO® flat leg grippers on longer legs for maximum aerodynamics

KISS Tri seat pad that provides comfort on the bike and that you almost don't feel during the run

THE
GOOD-AT-EVERYTHING
RACE SUIT

The best triathletes are the ones who are good at everything. That's why we put so much into this suit.

Let's start in reverse order:

Run: At this point in the race, fatigue sets in. You'll love the comfort of this suit. The front Samremo opening construction doesn't pull you forward, and it makes pee stops easier and lets you open it up when you feel too hot. The fabrics are quick drying, light and cool. The seat pad that felt so good on the bike is small enough you hardly feel it. The two rear pockets compress your gels so they don't bounce around. The long legs with GIRO® leg gripper elastic don't ride up and don't bind. Maybe you'll even notice that you don't have as many burning spots where you've been chafed raw. Somehow, you're thinking that comfort gives you an extra push, some extra speed.

Bike: You relish these couple of hours to put some distance into the other guys. This suit benefits from the aero research of Castelli's Pro PR suit but is tuned for speeds ranging from medium to high. The legs and sleeves provide excellent coverage while the back gives decent sun protection and the two pockets hold plenty of nutrition. And you appreciate the Castelli know-how in seat pad construction. Put your head down and pass a few more riders.

Swim: The reduced seaming and long arms and legs help you cut through the water while the pockets lie flat and don't catch water. The fit is snug and the lightweight fabrics don't hold as much water. The shoulder area is extra stretchy for freedom of movement even under a wetsuit or swimskin.

FOR OLYMPIC
TO IRONMAN DISTANCES

We made this suit to be compliant with ITU rules but with the fabrics, aerodynamics and cargo-carrying capacity to be ideal for 70.3 races, and even to win the odd Ironman World Championships, like Fred Van Lierde did in this suit in 2013. It has the fabrics, the pockets and the KISS Tri seat pad of our Free long-distance race suits to offer exceptional performance in a wide variety of races.

TRIATHLON DISCIPLINES

Freedom of movement in the water, aerodynamics on the bike, comfort on the run

Velocity Rev2 aero fabric on front-facing surfaces

UPF 16 Velocity mesh back blocks 94% of UV light with generous breathability

2 rear pockets lie flat and prevent nutrition from bouncing around

Giro³ flat gripper elastic lies flat on lower back

SnapLock fastener at lower back to clip to Free Tri Short to prevent riding up during swim or bike leg

YKK® Camlock® zipper

Elbow-length sleeves for maximum aerodynamics

THE RIGHT RACE JERSEY FOR SPEED AND COMFORT

Some triathletes choose long sleeves for the extra speed. Some for the comfort. Some for sun protection. This jersey gives you all three.

The aerodynamic speed is unmatched. It's what Castelli does best. We have a year-round testing and development program with the Norwegian Technical University in Trondheim to make our race gear the slickest around.

The comfort is what comes from our expert pattern engineers and soft performance Italian fabrics. We reduce the number of seams so that there is less chafing and less to bother you when you should be concentrating on pounding out the run.

Sun protection ... well, you've trained untold hours for this day. We focus on speed, but we still manage to block 94% of UV rays with our back Velocity mesh fabric that doesn't compromise speed, comfort or breathability. You may want to add some sunscreen, but this fabric provides UPF 16 protection, which is a significant help. Your cotton T-shirt is probably UPF 8.

Take note of the well-thought-out details: Castelli's generous two pockets lie flat but hold a lot of gear and nutrition. The SnapLock fasteners clip to Castelli shorts to prevent the top from riding up during the swim or bike.

016
GLACIER LAKE

SET A NEW
PERSONAL BEST

This suit, which set a new course record at Kona in its first race with Cameron Wurf, uses everything we know to make your next long-distance race your fastest ever.

In 2016 we started our aero research project with the Norwegian Technical University in Trondheim. Besides having a couple of brilliant professors and PhD students to come up with ideas and do the basic research, they have a couple of wind tunnels, rapid prototyping capabilities, CFD analysis and a true desire to make fast stuff. The first big success from the research was Team Sky's TT suit that placed four riders in the top eight at the opening Tour de France time trial. Then the UCI made it illegal.

So this suit isn't UCI legal (but neither is your bike). It's faster than the pro cyclists' suits and very illegal due to the silicone ribs in the arms. The main body fabric is an impossibly light 50 denier — usually in sports clothing 40 denier is considered ultrafine. The legs and sleeves are long for aerodynamics, while the light fabrics are great for dealing with heat since they're thin enough to not get weighed down, yet the 8% Lycra® content holds a bit of moisture next to your skin for rapid cooling. The insane stretch allows us to make something that truly fits like a second skin on the bike but that doesn't restrict in any way on the swim or run.

Our KISS Tri pad offers some welcome padding while you're on the bike but is thin enough to not bother you on the run.

This suit offers real time savings on the bike leg while providing cooling and comfort on the run, but it was made with the expectation of being worn under a swimskin or wetsuit for the swim. It's optimized for high speeds — top age groupers or pro athletes, or anyone looking to set a new PR.

CASTELLI OFF-BIKE

CASTELLI OFF-BIKE

Castelli traces its roots back to 1876 and a tailor shop in the center of Milan called Vittore Gianni, known for quality, innovation and a passion for sports that led to outfitting Alfredo Binda, Juventus and AC Milan, and even creating costumes for the Milan Ballet. The DNA was set, even if the scorpion and the Castelli name wouldn't appear until just before the company's 100th anniversary.

That DNA is what the VG Atelier products are about. Craftsmanship, obsession, tech and style from Vittore Gianni's atelier. This is off-bike wear designed to make cyclists look and feel good between rides. Handmade garments using fine fabrics and artisan techniques. What the dapper cyclists are wearing this season.

In making the world's finest cycling clothing, we sometimes find bits that transform perfectly into off-bike wear. Just like back in the day in Maurizio Castelli's design studio. Fabrics, construction and style reinterpreted so you can look smart and feel fast off the bike between rides. We keep the branding low-key so that you can wear these pieces to the office or when taking the missus to a fine restaurant. Seriously casual meets grand tour-winning performance.

For when you're ready for advanced performance relaxing. These pieces are tees, polos, hoodies, sweatshirts, shorts and pants with athletic relaxed cuts and comfort fabrics. Much of this gear is the same as what we give to our pro riders for travel and recovery, while other pieces are made to let you live your passion 24/7. Sportswear from and for cyclists.

LINEA PELLE

001

LINEA PELLE COMBO PACK 8800103

All three Linea Pelle products delivered in a mesh drawstring bag.

001

CHAMOIS DRY LUBE 8800100

Moist skin is softer and more susceptible to abrasion, as any rider who has done a long race in the rain can attest. Our dry lube reduces friction without weakening the skin through moisturizers. We also use 100% natural tea tree oil for antibacterial and antimicrobial properties to help prevent infections and saddle sores

001

FOUL WEATHER CREAM 8800102

This cream is designed to protect your skin from wet, dirty conditions. It is not petroleum based and won't damage the fabric of your bike shorts. It is also easier to clean off with soap and warm water.

001

WARMING EMBRO CREAM 8800101

This cream creates a warming sensation that helps "wake up" muscles on cooler days or can also help relieve sore muscles. We used mostly natural ingredients to create a strong warming sensation but without the burning feeling that you get with some products. This cream can be used underneath the Foul Weather Cream for racing in cold and wet conditions

RACE BAGS

RACE BRIEFCASE 8900112

SIZE: 36 x 28 x 10 - 14 cm

- Bag to carry computers and documents
- Outer pocket with lots of small shelves
- Sleeve with access from the outside
- Zipper to expand the briefcase
- Main compartment divided in 3 incl. padded computer space
- Back compartment that can also be opened to slide onto a trolley handle

CASTELLI PADS

PROGETTO X² S E A M L E S S

0 1. SKIN CARE LAYER

The Progetto X² Air Seamless seat pad is used to protect your skin while providing just the right level of padding for maximum comfort, no matter how long your epic ride is.

0 2. SEAMLESS INTEGRATED TECHNOLOGY CUSHIONING LAYER

A separate component provides no-compromise cushioning, with Castelli's infinitely variable thickness to bring the right shape to the right part of the body: thicker under the sit bones and thinner on the sides and under the perineum.

0 3. VISCOUS COMFORT INSERTS

Perforated viscous padding is added under the highly sensitive ischial and perineum pressure areas.

KISSair²

0 1. SEAMLESS SKIN CARE LAYER

The softest-ever fabric next to your skin for immediate and long-lasting comfort. Seamlessly engineered to reduce chafing and abrasion. Stretchy to move with you.

0 2. DUAL DENSITY, INFINITELY VARIABLE THICKNESS

Dual-density infinitely variable thickness gives you the perfect cushioning in every part of the pad. Maximum thickness and density in the ischial zone, tapering to moderate thickness under the perineum and minimum thickness at the perimeter.

0 3. ANATOMICAL SHAPE

Comfort is further enhanced by the creation of a perfect interface to your body during every pedal stroke.

KISSTRI

0 1. SEAMLESS SKIN CARE LAYER

A super soft, brushed microfiber top that maximizes comfort and fit. Seamlessly engineered to eliminate chafing and abrasion. Flexible to move with you. Bacteriostatic treatment to avoid saddle sores and infection.

0 2. MULTI DENSITY FOAM

Specifically designed for the triathlete. Minimum bulk doesn't get in the way during the swim and run legs. Extra fast drying foam prevents chafing on the bike.
