## HELMET TECHNOLOGY | DESIGN | STYLE

**In Mold** – direct moulding of the polystyrene to the shell forms an inseparable bond between the two materials. Thanks to this technology the helmet has very good mechanical features and excellent look.

**Hard Shell** – thanks to the combination of very hard polycarbonate top shell and inside polystyrene shell the helmet is able to absorb the shocks and guarantees very high level of protection and safety.

**CFS (Comfort Fit System)** – new advanced fit system provides the perfect adjustment, in every direction, to match every individual head shape – 3D fixing system.

**QFS (Quick Fit System)** – fit system which provides the perfect adjustment according to the head perimeter and ensures safety and comfortable positioning on the head. Maximum comfort is achieved by using very exact fixing mechanism with anatomically shaped wheel.

**EFS (Easy Fit System)** – fit system which provides the perfect adjustment according to the head perimeter. Perfect cycling helmet set-up is the basic presumption not even for its good function but also for the comfortable bike ride.

**LED Light** – rear integrated light increases your safety during your ride on the road. Due to this active security equipment your visibility will be much higher even in worse weather condition, in the darkness or night.

**E-bike ready** – Means that this product is suitable for using on e-bike which demand equipment with higher durability and safety features. Cycle helmets have to be able to absorb hits in high speed, also additional safety features are welcomed.

All Etape cycling helmets are certified according to the EN 1078+A1 standard.

## GLOVES TECHNOLOGY | DESIGN | STYLE

**Take Off System** – very effective system made by two silicone straps that guarantee very comfortable gloves removal.

**Shift Ready** – reinforcement between thumb and forefinger is perfect for grip shifting.

**Lady Cut** – women models have a cut which respects specific female hand shape. Also, the fabrics and gel padding position are different.

**Max Air Comfort** – lightweight and breathable fabrics for excellent wicking. Bi-elastic mesh panels for maximal comfort and ventilation.

**Anti Slip System** – there are well-shaped anti slip fabrics on palm which enable firm grip of handlebar and prevent from slipping.

**SmartTouch** – thanks to SmartTouch technology, you will be able to interact your touchscreen (whether it is your MP3, camera, video camera, navigation or mobile phone).

**Gel Pro Technology** – special gel padding guarantee maximal and long-lasting shock resistance of your hand. The right position of gel padding is very important for comfort and safe ride.

**Sweat Dry Comfort** – smooth antibacterial terry cloth on the thumb to dry the sweat in the hot weather or exhausting ride.

## FABRIC TECHNOLOGY

**SuperDryntex** Fabric made from functional polyester yarn. SuperDryntex is softer, more comfortable and with more natural touch than cotton or regular synthetic fibres. Very quickly transports moisture to the outside and thanks wicking effect keeps your body constantly fresh. Thanks to antibacterial treatment is very easy to take care of SuperDryntex garment. Different fabric styles made of SuperDryntex fibres offer various features and thermo-insulation features.

**MicroCool** The new functional fabric MicroCool is made of fine polyester fibres. Thanks to 3-D structure offers much better moisture evaporation from body and keep your body dry and comfortable during intensive performance.

**AirMesh** High breathable fabric used for most exposed parts. Prevents unwanted overheat and offers great moisture management. Thanks to its elasticity provides perfect fit.

**Fibra Pro™** New fabric designed for pro race or just for ride. Its unique structure provides perfect moisture management, the fabric is highly elastic and makes you feel comfortable even during whole day ride.

**Lycra Sport Energy** The fabric offers compression power with freedom of movement. This Lycra fabric helps garments maintain originally engineered compression levels. The garments with Lycra fibres help you look and feel great.

**X series** Materials X series are highly breathable and provides durability. Perfectly combine requirements of sports apparel and lifestyle clothing. Material XC and X5 provides outstanding stretch.

**ThermoFit** is highly stretchable fabric with excellent thermo-insulation features provides durability. The fabric has very good elasticity, smooth soft touch and antibacterial finish.

**WindShell** Windproof fabric made of polyamide fibers with water-repellent finish. Inside protective layer increase resistance to windy and rainy weather. The fabric is very light and therefore the garment is possible to pack into small pouch.

**SoftShell** is elastic fabric, wind and water resistant with outstanding thermo-insulation features. Inner layer constitutes of functional membrane (water column > 10 000 mm, breathability 10 000 g/m²/24 h). Outer layer is water repellent and become dry fast.

**ClimaWell** Polypropylene yarn with active silver ions added to a core of the yarn to ensure long lasting antibacterial effect.

**Stretch** Seamless technology of Etape Stretch seat pad and its all-directions elasticity ensure maximum comfort during the bike ride. The seat pad shape and structure respect the anatomical differences of a woman body (**Stretch Woman**) and of a man body (**Stretch Man**).

**Soft** Soft Seamless technology of Etape Soft seat pad ensures maximum comfort during the bike ride. The seat pad shape and structure respect the anatomical differences of a man body (**Soft Man**) and of a children body (**Soft Kid**).
